**Human Rights and Adolescence** Jacqueline Bhabha, 2014-08-12 While young children's rights have received considerable attention and have accordingly advanced over the past two decades the rights of adolescents have been neglected This manifests itself in pervasive gender based violence widespread youth disaffection and unemployment concerning levels of self abuse violence and antisocial engagement and serious mental and physical health deficits The cost of inaction on these issues is likely to be dramatic in terms of human suffering lost social and economic opportunities and threats to global peace and security Across the range of disciplines that make up contemporary human rights from law and social advocacy to global health history economics sociology politics and psychology it is time the contributors of this volume contend for adolescent rights to occupy a coherent place of their own Human Rights and Adolescence presents a multifaceted inquiry into the global circumstances of adolescents focusing on the human rights challenges and socioeconomic obstacles young adults face Contributors use new research to advance feasible solutions and timely recommendations for a wide range of issues spanning all continents from relevant international legal norms to neuropsychological adolescent brain development gender discrimination in Indian education to Colombian child soldier recruitment stigmatization of Roma youth in Europe to economic disempowerment of Middle Eastern and South African adolescents Taken together the research emphasizes the importance of dedicated attention to adolescence as a distinctive and critical phase of development between childhood and adulthood and outlines the task of building on the potential of adolescents while providing support for the challenges they experience Contributors Theresa S Betancourt Jacqueline Bhabha Krishna Bose Neera Burra Malcolm Bush Jocelyn DeJong Elizabeth Gibbons Katrina Hann Mary Kavar Orla Kelly David Mark Margareta Matache Clea McNeely Glaudine Mtshali Katie Naeve Elizabeth A Newnham Victor Pineda Irene Rizzini Elena Rozzi Christian Salazar Volkmann Shantha Sinha Laurence Steinberg Kerry Thompson Jean Zermatten Moses Zombo **Resources in education** ,1991

Social and Economic Effects of Community Wireless Networks and Infrastructures Abdelaal, Abdelnasser, 2013-02-28 It is surprising to think that in today's rapidly evolving world of technology over half of the globe still does not have access to high speed internet Creating community wireless networks has in the past been a way to provide remote communities with internet and network access Social and Economic Effects of Community Wireless Networks and Infrastructures highlights the successes of community wireless networks but also boldly addresses the potential risk factors and broader socioeconomic concerns This publication's exploration of previous successes and failures various designs and potential challenges with CWNs makes it a valuable resource for researchers practitioners vendors and activists *Employment and Training Reporter* ,1980 **Boardroom Reports** ,1976 Research in Education ,1969 **World Development Report 2013** World Bank, 2012-10-15 Jobs provide higher earnings and better benefits as countries grow but they are also a driver of development Poverty falls as people work their way out of hardship and as jobs empowering women lead to greater

investments in children Efficiency increases as workers get better at what they do as more productive jobs appear and less productive ones disappear Societies flourish as jobs bring together people from different ethnic and social backgrounds and provide alternatives to conflict Jobs are thus more than a byproduct of economic growth They are transformational they are what we earn what we do and even who we are High unemployment and unmet job expectations among youth are the most immediate concerns But in many developing countries where farming and self employment are prevalent and safety nets are modest are best unemployment rates can be low In these countries growth is seldom jobless Most of their poor work long hours but simply cannot make ends meet And the violation of basic rights is not uncommon Therefore the number of jobs is not all that matters jobs with high development payoffs are needed Confronted with these challenges policy makers ask difficult questions Should countries build their development strategies around growth or should they focus on jobs Can entrepreneurship be fostered especially among the many microenterprises in developing countries or are entrepreneurs born Are greater investments in education and training a prerequisite for employability or can skills be built through jobs In times of major crises and structural shifts should jobs not just workers be protected And is there a risk that policies supporting job creation in one country will come at the expense of jobs in other countries The World Development Report 2013 Jobs offers answers to these and other difficult questions by looking at jobs as drivers of development not as derived labor demand and by considering all types of jobs not just formal wage employment The Report provides a framework that cuts across sectors and shows that the best policy responses vary across countries depending on their levels of development endowments demography and institutions Policy fundamentals matter in all cases as they enable a vibrant private sector the source of most jobs in the world Labor policies can help as well even if they are less critical than is often assumed Development policies from making smallholder farming viable to fostering functional cities to engaging in global markets hold the key to success
