Case, Leping Liu, Joseph Mintz, 2025-11-17 This volume provides five exploratory studies on the constraints and affordances of artificial intelligence AI specifically examining ChatGPT's applications among preservice teachers preparing to teach multilingual learners Through detailed analysis of classroom implementation student perceptions and pedagogical outcomes this collection offers groundbreaking insights into how large language models can transform teacher preparation programs Three studies present firsthand accounts of preservice teachers' experiences with ChatGPT revealing a pragmatic orientation where adoption hinges on student motivation accelerated English language development and ease of use The remaining two studies investigate ChatGPT produced text as an instructional tool highlighting its potential for fostering critical analysis while emphasizing the necessity of thoughtful integration through careful teacher planning This volume speaks directly to graduate students teacher educators educational technology specialists TESOL professionals and researchers in applied linguistics and AI ethics It bridges multiple disciplines including educational technology second language acquisition teacher preparation multilingual education and artificial intelligence in education The research presented in this volume contributes to ongoing conversations about technological innovation in classrooms ethical considerations in AI implementation and evolving best practices for preparing teachers to work effectively with multilingual populations in technology enhanced learning environments The chapters in this book were originally published as a special issue of *Computers in the Schools* **Human Interaction & Emerging Technologies (IHET-AI 2023):**

**Artificial Intelligence & Future Applications** Tareq Ahram and Redha Taiar, 2023-04-13 Human Interaction Emerging Technologies Artificial Intelligence Future Applications Proceedings of the 9th International Conference on Human Interaction and Emerging Technologies IHET AI 2023 April 13-15 2023 Lausanne Switzerland *Invocational Media* Chris Chesher, 2023-10-19 *Invocational Media* critiques the sociotechnical power of digital technologies by introducing the concept of invocational media What is an invocation Ask your voice assistant and it will define it for you It is a media artefact that responds to many invocations such as seeking the weather forecast requesting any song you can name or turning on the

lights almost magically This contemporary manifestation of the ancient practice of invocation gives an immediate response to your call in a way that Chris Chesher argues is the characteristic power of all computers which he redefines as invocational media This book challenges the foundations of computer science by offering invocation as a powerful new way of conceptualising digital technologies Drawing on media philosophy Deleuze Guattari Heidegger Latour Austin Innis and McLuhan it critiques the representationalism of data processing artificial intelligence and virtual reality Invocational media seem to empower individuals but necessarily subject users to corporate and government monopolies of invocation They offer many solutions but only by reducing everything to the same kind of act They complicate agency in their indifference as to whether invokers are human or non human With robotics they invoke material form to act physically and autonomously People willingly make themselves invocable to surveillance and control by creating their own profiles and marking themselves with biometrics This ground breaking book will change how you think about digital media by showing they are in fact invocational media
