*Money, Power, and AI* Zofia Bednarz, Monika Zalnieriute, 2023-11-15 In this ambitious collection Zofia Bednarz and Monika Zalnieriute bring together leading experts to shed light on how artificial intelligence AI and automated decision making ADM create new sources of profits and power for financial firms and governments Chapter authors which include public and private lawyers social scientists and public officials working on various aspects of AI and automation across jurisdictions identify mechanisms motivations and actors behind technology used by Automated Banks and Automated States and argue for new rules frameworks and approaches to prevent harms that result from the increasingly common deployment of AI and ADM tools Responding to the opacity of financial firms and governments enabled by AI Money Power and AI advances the debate on scrutiny of power and accountability of actors who use this technology This title is available as Open Access on Cambridge Core

Measurement and Safety Béla G. Lipták, Kriszta Venczel, 2016-11-25 This handbook is dedicated to the next generation of automation engineers working in the fields of measurement control and safety describing the sensors and detectors used in the measurement of process variables

*Surveillance Education* Nolan Higdon, Allison Butler, 2024-08-02 Surveillance Education explores the pervasive use of digital surveillance technologies in schools and assesses its pernicious effects on students Recognizing that the use of digital technologies will persist the authors instead offer practical ways to ameliorate their impact In our era of surveillance capitalism digital media technologies are ever more intertwined into the educational process Schools are presented with digital technologies as tools of convenience for gathering and grading student work as tools of support to foster a more equitable learning environment and as tools of safety for predicting or preventing violence or monitoring mental emotional and physical health Despite a dearth of evidence to confirm their effectiveness digital data collection and tracking is often presented as a way to improve educational outcomes and safety This book challenges these fallacious assumptions and argues that the use of digital media technologies has caused great harm to students by subjecting them to oppressive levels of surveillance impinging upon their right to privacy and harvesting their personal data on behalf of Big Tech In doing so the authors draw upon interviews from K 12 and higher

education students teachers and staff civil rights and technology lawyers and educational technological programmers The authors also provide practical guidance for teachers administrators students and their families seeking to identify and combat surveillance in education This urgent eye opening book will be of interest to students and educators with interests in critical media literacy and pedagogy and the sociology of technology and education     *Journal of Computer-based Instruction* ,1988     **Defense & Foreign Affairs** Gregory R.
