Machine Learning for Business Analytics Hemachandran K, Sayantan Khanra, Raul V. Rodriguez, Juan Jaramillo, 2022-07-21 Machine Learning is an integral tool in a business analyst's arsenal because the rate at which data is being generated from different sources is increasing and working on complex unstructured data is becoming inevitable. Data collection, data cleaning, and data mining are rapidly becoming more difficult to analyze than just importing information from a primary or secondary source. The machine learning model plays a crucial role in predicting the future performance and results of a company. In real-time data collection and data wrangling are the important steps in deploying the models. Analytics is a tool for visualizing and steering data and statistics. Business analysts can work with different datasets, choosing an appropriate machine learning model, results in accurate analyzing, forecasting the future, and making informed decisions. The global machine learning market was valued at 1.58 billion in 2017 and is expected to reach 20.83 billion in 2024, growing at a CAGR of 44.06% between 2017 and 2024. The authors have compiled important knowledge on machine learning, real-time applications in business analytics. This book enables readers to get broad knowledge in the field of machine learning models and to carry out their future research work. The future trends of machine learning for business analytics are explained with real case studies. Essentially, this book acts as a guide to all business analysts. The authors blend the basics of data analytics and machine learning and extend its application to business analytics. This book acts as a superb introduction and covers the applications and implications of machine learning. The authors provide first-hand experience of the applications of machine learning for business analytics in the section on real-time analysis. Case studies put the theory into practice so that you may receive hands-on experience with machine learning and data analytics. This book is a valuable source for practitioners, industrialists, technologists, and researchers.

Machine Habitus Massimo Airoldi, 2021-12-13 We commonly think of society as made of and by humans, but with the proliferation of machine learning and AI technologies, this is clearly no longer the case. Billions of automated systems tacitly contribute to the social construction of reality by drawing algorithmic distinctions between the visible and the invisible, the relevant and the irrelevant, the likely and the unlikely, on and beyond platforms. Drawing on the work of Pierre Bourdieu, this book develops an original sociology of algorithms as social agents actively participating in social life. Through a wide range of examples, Massimo Airoldi shows how society shapes algorithmic code and how this culture in the code guides the practical behaviour of the code in the culture-shaping society, in turn. The machine habitus is the generative mechanism at work throughout myriads of feedback loops linking humans with artificial social agents in the context of digital infrastructures and pre-digital social structures. *Machine Habitus* will be of great interest to students and scholars in sociology, media and cultural studies, science and technology studies, and information technology, and to anyone interested in the growing role of algorithms and AI in our social and cultural life.
