**Generative AI and Education B.**

Mairéad Pratschke, 2024-08-27 This volume addresses the gap in knowledge around generative AI and its applications in education. It draws on the recent history of technological innovation and digital pedagogies, locating generative AI in the contemporary discourse around education futures. It argues that a new hybrid model of education is emerging, requiring educational institutions to embed generative AI into course and programme design, delivery, and assessment. It also proposes a shift from a focus on learning as output to learning as a process and explores what that shift might look like. Grounded in educational theory, it offers actionable pedagogy informed guidance on how to position AI as a collaborator in the construction of learning in a manner that is congruent with the values and aims of education. It offers advice based on evidence-based digital pedagogy, including frameworks for effective teaching and learning with generative AI that enable educators and designers to put these ideas into practice. The book also explores the wider context informing this shift, connecting narratives from governments and industry leaders on the strategic importance of generative AI and lifelong learning, learning agility, and future skills that make the case for the integration of competency-based assessment into mainstream education. Finally, going beyond pedagogy and practice, it considers some of the broader issues, including limitations and ethics, and the implications of integrating generative AI into institutional planning and design, and includes a sample roadmap for education leaders to start the process of integrating generative AI into their institutions. This work approaches the topic of generative AI from the vantage point of educators by addressing themes and concerns that will resonate with professionals in the sector.

*A Leadership Playbook for Addressing Rapid Change in Education* Teresa L. San Martin, 2023-03-17 A Leadership Playbook for Addressing Rapid Change in Education provides educational leaders with a simple step-by-step approach for addressing rapid change. Drawing on the model of appreciative inquiry, this book provides detailed examples of educational problems and provides the who, what, where, when, why, and how to achieve change. Author Teresa L. San Martin emphasizes the traits of outstanding and exceptional leaders: trust, collaborative efforts, communicating with empathy, and care. Detailed play-by-play examples are provided that show how school administrators are able to solve relevant problems of practice, such as how to create productive and focused high school teacher teams, how educational leaders can increase teacher retention, and how district administrators can provide innovative and meaningful staff development opportunities. This timely book, which supports educators as they continue to grapple with the effects of the pandemic, provides real solutions, equipping school administrators with the tools necessary to confront perpetual change occurring in today's complex educational environment.

**Congressional Record** United States. Congress, 1997 **AI in Social Studies Education** Christopher H. Clark, Cathryn van Kessel, 2025 The introduction of widely available generative AI tools has caused a frenzy of both positive and negative reactions. Between utopian visions and apocalyptic predictions of AI's impact on education, there is a need to thoughtfully consider what education in the age of AI can and should look like. This volume focuses on the implications of AI technology for teachers in K-12 and university settings, providing a careful look at its
