NHERI 2015-2025: A Decade of Discovery in Natural Hazards Engineering Cheryl Ann Blain, Julio Alfonso

Ramirez, David Richard Johnson, Navid Jafari, Qin Chen, Jack Cadigan, Rebecca Napolitano, 2025-11-18 Natural hazards such as earthquakes, landslides, windstorms, wildfires, tsunamis, and storm surge are all occurring with increased frequency and intensity. These events often cause significant disruptions to our built environment consisting of buildings, roads, bridges, parks, streets, and systems that provide transportation, water, power, and more, bringing to the forefront our need for solutions. In the last three years, the U.S. experienced an average of 20 billion dollar disasters per year up from 12.8 billion dollar disasters per year in the 2010s and 6.7 billion dollar disasters per year in the 2000s. NOAA Research in natural hazards engineering aims to develop tools and methods that will mitigate such damage in the future. Funded by the National Science Foundation, the Natural Hazards Engineering Research Infrastructure (NHERI) is a national network of university-centered experimental facilities. NHERI facilities are dedicated to reducing damage and loss of life due to natural hazards such as earthquakes, landslides, windstorms, wildfires, tsunamis, and storm surge. The NHERI network provides researchers in the natural hazards engineering and social science communities with state-of-the-art tools, data, and training needed to meet the research challenges of the 21st century. NHERI's 14 member network (see graphic below) includes eight experimental facilities, a social science component, a center for computational modeling and simulation, a RAPID reconnaissance facility, a network coordination office, and a cyberinfrastructure. Two more experimental facilities are in the planning phase. To raise awareness and to encourage shared use of NHERI experimental facilities, the Network Coordination Office led an effort for all NHERI components to publish informational articles in the journal *Frontiers in Built Environment* and to create an E-book with the collection of all 15 articles. In the spring of 2020, NHERI established its own research topic in FBE: Natural Hazards Engineering Research Infrastructure. NHERI 2016-2020: Mitigating the Impact of Natural Hazards on Civil Infrastructure and Communities. The NHERI topic consists of 15 articles written by more than 100 authors. A second series of publications in 2023 focused on the transfer of technology from research undertaken at NHERI-affiliated institutions. Technology transfer took the form of regulatory changes, updates to post-disaster reconnaissance procedures to account for multiple hazardous events, approaches to community engagement that led to earlier adoption of technology, and tools that enabled end users to prioritize hazard mitigation efforts, to name a few. Now, after almost a decade of operations, we examine how the NHERI network has changed the way people practice and conduct research in natural hazards engineering. From state-of-the-art unique experimental facilities that tackle hazards from wind, waves, storm surge, and earthquakes to a real-time resource for field reconnaissance equipment to a cyberinfrastructure that publishes and archives natural hazards data for reuse to the coordination office that has developed an education pipeline for future natural hazards researchers to a social sciences hub that has reshaped how post-event reconnaissance is undertaken and to modeling and simulation tools that deliver risk analyses, the NHERI network researchers have advanced engineering research and practice. To this end, we are soliciting

original research papers 12 000 words with no more than 15 figures tables that highlight how the NHERI network has changed the way people practice and conduct research in natural hazards engineering This capstone collection will emphasize the NHERI network s impact specific ways that NHERI researchers have advanced engineering research and practice *Official Gazette of the United States Patent and Trademark Office ,2002* **The Everything Guide to Remote Work** Jill Duffy,2022-02-08 Discover the secret to being productive and successful no matter where you are with this essential guide to remote work During COVID 19 working from home became the new normal Now both employers and employees find that the remote work they were forced to adjust to may be well better financially sustainably and even in terms of overall morale and productivity But working from home is not without its challenges It can be difficult to eliminate distractions strike a solid work life balance and maintain social connections that are crucial in the workplace Whether you re trying to find and land a job from the comfort of your home learning to manage a virtual team or dream of living a digital nomad lifestyle The Everything Guide to Remote Work has everything you need to be successful You ll learn to optimize your own workplace culture whether it s in your home office or a constantly changing backdrop So whether your company continues to work remotely full time or you only have to go to the office a few days a week you ll be armed with all the tools you ll need to make the most out of this new lifestyle **Remote Work Trends 2025** Kits for Life,2025-01-20 Discover how remote work is transforming in 2025 with Remote Work Trends 2025 Navigating the Future of Work from Anywhere This comprehensive guide explores the evolution of remote work hybrid models AI driven collaboration tools global hiring and strategies for building thriving remote first teams Dive into insights on employee wellbeing sustainability coworking spaces and legal considerations Packed with case studies real world examples and actionable advice this book equips remote workers freelancers and employers to stay ahead of emerging trends and succeed in the new era of work In Remote Work Trends 2025 Navigating the Future of Work from Anywhere we explore key topics such as the Future of Remote Work the rise of Hybrid Work Models and the impact of Remote First Companies on modern businesses The book dives into the latest Remote Work Technology including AI in Remote Work and how these advancements are reshaping workflows With the growth of the Global Talent Pool companies can hire globally navigating challenges like time zones cultural differences and language barriers We also address critical issues like Employee Wellbeing and Remote Work Mental Health in Remote Work and strategies for fostering Remote Work Culture As remote work continues to evolve the book covers practical solutions for Remote Work Sustainability Remote Work Challenges and the integration of Coworking Spaces for Remote Workers The increasing popularity of Freelancers and Gig Economy 2025 is explored offering guidance for Digital Nomads and Freelancers in this new era Additionally the book examines Legal Considerations for Remote Work Remote Work Policies 2025 and tools for Virtual Offices and Collaboration Tools Finally it provides insights into Sustainable Remote Work Practices and strategies for boosting Remote Work Productivity *The Live Enterprise: Create a Continuously Evolving and Learning*
