Building a Brand for Nerds Guide Book Matt Kingsley, Let s be brutally honest You re smart You think logically You probably see patterns and systems where others see chaos And because of that you likely suspect that 90% of the social media marketing advice out there is complete unadulterated bullshit You re tired of the gurus shouting about passion and authenticity while offering zero repeatable process You re sick of chasing fleeting trends praying to algorithm gods and dumping time and money into strategies based on hope instead of math You see people celebrating vanity metrics likes followers that don t pay the bills and your analytical brain screams THIS IS STUPID And you re right It is stupid You re likely drowning in platform options contradictory advice and the overwhelming pressure to be everywhere doing everything all while feeling like you re fundamentally not built for this flashy often irrational world of marketing Maybe you ve tried gotten mediocre results felt like you wasted precious time you could have spent building something real and decided social media is just a rigged game you can t win WRONG That analytical brain the one that craves logic data and efficient systems The one you might think is a disadvantage in this hype fueled circus That s your weapon That s your unfair advantage You just need the right operating system the right playbook designed for how you think

Stop trying to play their game Play your game This book Social Media Marketing for Nerds isn't another collection of feel good fluff or soon to be obsolete hacks This is the blueprint for turning social media from a confusing time suck into a predictable profit driven machine built specifically for analytical minds like yours Inside we're not talking about finding your voice we're talking about Engineering Reach Deconstructing algorithms with logic so you control your visibility instead of begging for it Data Driven Platform Selection Using first principles and ROI calculations to choose where to invest your time ditching the FOMO Irresistible Offer Construction Applying the Value Equation to craft lead magnets and core offers so good people feel stupid saying no Because content isn't king the OFFER is Minimum Viable Content Machines Building systems for consistent high leverage output without the crippling perfectionism that kills momentum Sanity Metrics Over Vanity Identifying and tracking the few key numbers that actually predict revenue using data as a lie detector against marketing BS De Risking Paid Ads Turning ad spend from a gamble into a predictable investment by mastering the math LTV CPA Organic Compounding Systematically repurposing content for exponential visibility without exponentially increasing effort Leverage not just hard work Building Defensible Tribes Engineering community as a competitive moat that locks in customers and increases LTV Ruthless Automation Identifying bottlenecks and implementing tool stacks to reclaim your time for high value strategic work Authentic Selling via Process Using structured value driven conversations even in DMs to convert leads without feeling slimy Contrarian Content Weaponizing your unique insights and intellectual honesty to stand out and build real authority Competitor Deconstruction Reverse engineering competitor wins and fails using public data to accelerate your own learning curve Profile Funnel Optimization Turning your social profile into a high velocity conversion asset Stoic Resilience Installing the mental algorithms to process negativity and stay focused on the mission Scaling Beyond Yourself Frameworks for delegation and hiring so you stop being the bottleneck Future Proofing Building core assets and anchoring to timeless principles so your business thrives regardless of platform shifts This isn't about becoming someone you're not It's about weaponizing who you are It's about taking your natural inclination towards logic data systems and efficiency and applying it ruthlessly to the problem of acquiring customers profitably through social media Stop letting the marketing world make you feel inadequate Stop wasting time on strategies that feel fundamentally illogical It's time to leverage your analytical superpower This playbook gives you the frameworks the systems and the mindset to out think out systematize and ultimately out execute those relying on hype and guesswork You have the blueprint You have the advantage The only question is are you going to keep analyzing from the sidelines or are you ready to step into the arena and execute Stop drowning in inefficiency Stop leaving money on the table Get the book Build the machine Dominate your market

Art, Media Design, and Postproduction Eduardo Navas, 2025-05-12 A concise guide to the creative application of appropriation and remix that offers a set of open ended guidelines for art and design studio based projects this book explores creativity with emerging technology including artificial intelligence This fully revised and expanded second edition engages with the

ongoing recycling and repurposing of content and form and the new directions the emerging form of metacreativity is taking art and design as artists continue to expand their creative methodologies Exploration of metacreativity is new to this edition with a focus on remix principles the implementation of data analysis and the delegation of parts of the creative process to automated algorithms and artificial intelligence Each chapter includes an introduction goals for guidelines of a studio based project with an explanation of relevant history as well as examples and case studies Each set of guidelines is open ended enabling the reader to repurpose the instructional material according to their own methodologies and choice of medium Navas also provides historical and theoretical context to encourage critical reflection The second edition remains the first book of guidelines to take into account the historical theoretical and practical context of remix as an interdisciplinary act This is an essential read for those interested in remix studies and appropriation in art design and media
