Catalog of Unconfirmed Comets - Volume 2 Gary W. Kronk,Maik Meyer,2024-05-30 This two volume catalog is the first in depth investigation of comets that were reported since the 17th century but not confirmed and subsequently lost Volume 2 covers objects observed between 1900 and the present a period that was dominated by photographic observations

and the detection of much fainter objects This book provides a distinctive blend of the historical and cultural aspects of comet hunting and discovery along with the utilization of contemporary tools in orbital mechanics and data analysis This comprehensive compilation offers a thorough catalog of unconfirmed comets Each case encompasses a detailed presentation of observations a discussion on the observer when feasible an examination of the historical context and a conclusive analysis of the object s nature The book predominantly showcases original material and photographs sourced from observatories libraries and historical societies worldwide exposing a significant number of illustrations that have never been previously published While some of these unconfirmed comets were determined to be misidentifications of minor planets artifacts caused by emulsion or optical effects or inaccurate observations of comets that were already under observation the Authors did manage to identify numerous objects that were likely genuine comets These observations hold potential value for the future as they could be observations of periodic comets yet to be formally identified In a handful of instances the Authors were also able to find new observations which led to the calculation of orbits for the first time enabling a formal announcement or identifying suspected comets that were already known to be periodic comets The Wall Street Journal,2006

Machine Learning for Societal Improvement, Modernization, and Progress Pendyala, Vishnu S.,2022-06-24 Learning has been fundamental to the growth and evolution of humanity and civilization The same concepts of learning applied to the tasks that machines can perform are having a similar effect now Machine learning is evolving computation and its applications like never before It is now widely recognized that machine learning is playing a similar role to electricity in the late 19th and early 20th centuries in modernizing the world From simple high school science projects to large scale radio astronomy machine learning has revolutionized it all however a few of the applications clearly stand out as transforming the world and opening up a new era Machine Learning for Societal Improvement Modernization and Progress showcases the path breaking applications of machine learning that are leading to the next generation of computing and living standards The focus of the book is machine learning and its application to specific domains which is resulting in substantial civilizational progress Covering topics such as lifespan prediction smart transportation networks and socio economic data this premier reference source is a dynamic resource for data scientists industry leaders practitioners students and faculty of higher education sociologists researchers and academicians *F & S Index United States* ,1997 **Congressional Record**
