YouTube Jean Burgess, Joshua Green, 2018-08-28 Since launching as a website for everyday video sharing in 2005 YouTube has become one of the world's most powerful digital media platforms. Originally published in 2009 when YouTube was only four years old, this book was the first to systematically investigate its cultural impacts and politics, highlighting the productive tensions between its amateur community rhetoric and its commercial media logics. Since then YouTube has grown as a platform and matured as a company. Its business model is built on coordinating the interests of and extracting value from its content creators, audiences, advertisers, and media partners in a commercial setting where YouTube now competes with other powerful social media and streaming television platforms. Meanwhile YouTube's diverse communities of content creators who developed the platform's most distinctive cultural forms and genres have strong ideas and interests of their own. While preserving the original edition's forensic analysis of YouTube's early popular culture and using this fully revised and updated edition weaves fresh examples, updated theoretical perspectives, and comparative historical insights throughout each of its six chapters, Burgess and Green show how over its more than a decade of existence YouTube's dual logics of commerciality and community have persisted, generating new genres of popular culture, new professional identities, and business models for the media industries, and giving rise to ongoing platform governance challenges. The book is essential reading for anyone interested in the contemporary and future implications of digital media platforms and will be particularly valuable for students and scholars in media communication and cultural studies.

The Robots Are Coming! Andres Oppenheimer, 2019-04-30 Staying true to his trademark journalistic approach, Andr s Oppenheimer takes his readers on yet another journey this time across the globe in a thought-provoking search to understand what the future holds for today's jobs in the foreseeable age of automation. *The Robots Are Coming* centers around the issue of jobs and their future in the context of rapid automation and the growth of online products and services. As two of Oppenheimer's interviewees, both experts in technology and economics from Oxford University, indicate, forty-seven percent of existing jobs are at risk of becoming automated or rendered obsolete by other technological changes in the next twenty years. Oppenheimer examines current changes in several fields, including the food business, legal work, banking, and medicine, speaking with experts in the field and citing articles and literature on automation in various areas of the workforce. He contrasts the perspectives of techno-optimists with those of techno-negativists and generally attempts to find a middle ground between an alarmist vision of the future and one that is too uncritical. A self-described cautious optimist, Oppenheimer believes that technology will not create massive unemployment but rather will drastically change what work looks like.
