Higher Education, Place, and Career Development Rosie Alexander, 2024-11-21 Drawing connections between the findings of a research project following young graduates from the Scottish islands of Orkney and Shetland current international evidence and theoretical literature this book argues that understanding rural and island student transitions can expose the wider dynamics of place and mobility at play during student and early career experiences Highlighting the importance of a career perspective Rosie Alexander encourages readers to consider how career pathways develop across time and across transition points unsettling the notion of a straightforward transition through university into the workplace The book uncovers how student trajectories are developed through interweaving dynamics of relationships place and career routes and unpacks the implications for policymakers and practitioners It contends that a much greater spatial awareness is necessary to understand and support the educational and career pathways of higher education students This is a crucial read for higher education researchers policymakers and students interested in rurality as well as access to and transition from higher education

GIScience Teaching and Learning Perspectives Shivanand Balram, James Boxall, 2019-01-31 This volume uniquely links educational theories and the practice of GIScience in higher education contexts to guide classroom practice present effective practical implementations from peers and provide resources and strategies for effective teaching methods The book offers a comprehensive exploration of GIScience education including current trends and future educational needs in GIScience and will act as a resource to prepare learners for a world that demands more intensive investment in present day education and technological literacy Additionally the indirect benefit of merging the fragmented literature on GIScience literacy will provide a basis to examine common techniques and enable a new wave of research more rooted in learning theories In ten chapters the book is designed to attract an audience from geographic information systems science geomatics spatial information science cartography information technology and educational technology as focus disciplines

[Internet Jobs for the Rest of Us](#) Deborah Gallant, Cindy Grogan, 2001 Proclaiming that Internet jobs are not just for geeks any more the authors reveal everything job hunters need to know to get in the Internet game how to make a

resume more Web friendly the lingo the basic skills and how to negotiate an employment package CIOs and the Digital Transformation Giorgio Bongiorno,Daniele Rizzo,Giovanni Vaia,2017-07-31 This book describes how chief information officers CIOs can embrace and drive the digital transformation by providing innovative leadership that uses old skills in a novel way The book explores ways in which new actors and factors will play a key role in this process and how new relations can be created among things data and people In addition the design of digital organizations and the implementation of digital technologies are carefully examined and it is explained how digital workspaces can be designed organized and used A set of methods is provided for linking new digital tools in order to meet the goals and challenges of building a digital enterprise The digital economy is disrupting the way of interaction within value chains creating fresh spaces for competition and novel ecosystems With the advent of social media networking mobility big data and cloud computing 4 0 manufacturing etc we are witnessing the birth of new digital organizations However sharing of leadership of this change among different actors can create disorder and inefficiency Against this background the future role of the CIO will be crucial **How to get rich in America** JTWAYNE,2015-09-01 This is a book on how to become rich and successful in America Occupational Outlook Handbook ,2000 **America's Top 300 Jobs** U S Dept of Labor,U.
