Technoliberalism and the End of Participatory Culture in the United States Adam Fish, 2017-04-18 This new book examines whether television can be used as a tool not just for capitalism but for democracy. Throughout television's history, activists have attempted to access it for that very reason. New technologies, cable, satellite, and the internet provided brief openings for amateur and activist engagement with television. This book elaborates on this history by using ethnographic data to build a new iteration of liberalism: technoliberalism, which sees Silicon Valley technology and the free market of Hollywood end the need for a politics of participation.

Marketing Metrics Christina Inge, 2022-09-03 Stop feeling overwhelmed by data and start using it to its full potential to create an agile and forward-looking strategy that enables customer-centric marketing, builds your brand, and develops product strategies. Many brands talk about creating a marketing strategy powered by data analytics and metrics. Yet too often they're still overwhelmed by data or unsure of how to use it to create a flexible and future-focused strategy that doesn't just validate what's happened in the past. Marketing Metrics takes readers through all the stages of implementing a data-first strategy, from early-stage adoption to more advanced customization. Featuring examples from a range of organizations including Coca-Cola and Mercedes-Benz, it shows how to create a strategy which leverages consumer data for customer-centric marketing, establishes the ROI of channels and campaigns, strengthens brands, and creates data-driven product strategies. Covering the range of new global laws that impact consumer privacy and data collection and usage, Marketing Metrics shows how to use data in a non-invasive, secure, and ethical way. Also showing how to communicate critical data to the right stakeholders and the skills of the data-savvy marketer, this is a clear and jargon-free guide to creating a future-focused and data-powered marketing strategy.

The Rise of the Curator Class Steffon Davis, 2019-03-14 Pairing big ideas in marketing with the popular activity of content curation, The Rise of the Curator Class positions curation as a humanization movement that is restructuring the internet. Curation is set to overturn the 2.2 trillion global creative industry, revolutionizing how we create, market, and discover content. In the era of content overload and fake news, in which everything to buy, listen to, read, or watch is available online, there is one group of people who have learned to thrive in this climate of superabundance: the curator class, whose influence and power grows as more people look to them as guides. This new curator class is rewriting traditional curation, tackling the overload and making sense of it for others. In the past, curation was available to an elite few. Now, internet platforms such as Pinterest, Spotify, and Twitter empower hundreds of millions of people to curate their ideas for anyone who may be interested, revolutionizing how content is marketed and sold. The Rise of the Curator Class explains how curation is disrupting internet commerce as consumer trust moves farther away from traditional brands and closer to the

curators who lead tastes and it equips readers to think critically about how curation can work for them
