Is Adult Education Broken Diane Shawe, *Is Adult Education Broken* DianeShaweAuthor explores the main failings in education for an economy powered by technology fueled by information driven by knowledge and becoming automated affecting the poor As Isaac Asimov a master of science fiction literature once said No sensible decision can be made any longer without taking into account not only the world as it is but the world as it will be What has happened Why have these large institutions priced education out of some fundamental principles How can we make the new economic age enhance rather than diminish our quality of learning How can we make this amazing innovation advance the prospects of all people especially those with experience and not just for the youth It is clear that at this moment most educational systems are not keeping pace with changing technology and the ever evolving world of work Not enough people are thinking strategically enough in this area Fundamentally we need to change what people learn how people learn when people learn and even why

people learn We must get beyond the traditional model of students sitting passively in classrooms following instructions and memorising material that they are tested and scored on which sometimes turn out to be of little use in an every changing economy It is evident that computers can do that for us There has always been a great deal of lip service given to the idea of learning by doing but not much has been done about it In fact John Dewey remarked in 1916 in his book Democracy and Education Why is it that in spite of the fact that teaching by pouring in learning by passive absorption are universally condemned that they are still so entrenched in practice That education is not an affair of telling and being told but an active constructive process is a principle almost as generally violated in practice as conceded in theory Transformative learning in time of crisis when Individuals face Collective Challenges Diane Shawe M Ed I think it is imperative that this century focuses on Adult Transformation Learning by providing Training On Demand During the last twenty years the use of the word crisis seems to have increased around the world Referring to sudden and intensely political economic social psychological cultural or environmental changes this term emerges now more frequently in everyday vocabulary According to transformative learning theory the emergence of a crisis represents a potential opportunity for personal and or collective transformation grounded in the capacity of individuals and groups to revisit the perspectives through which they interpret their own experience Considering recent history how does the emergence of social economic political cultural intellectual or environmental crisis manifest an opportunity or an expression of transformative learning How does the experience of individual or collective crisis affect the way one learns to critically interpret one s own experiences an interesting observation indeed

Meaning of Purpose Economy and Sustainable Development to Business Based on the Example of the Clothing Brand "Patagonia" Yannick Wichert, 2022-03-30 Academic Paper from the year 2021 in the subject Business economics Business Ethics Corporate Ethics grade 8 0 course Purpose Economy and sustainability language English abstract Since the rise in globalization and consumerism the world s leaders become increasingly aware of the negative consequences that are leading to a global climate crisis Nowadays almost everyone is aware that climate action becomes a necessity instead of an option in order to find a solution for this problem to save the planet One approach of how to reduce the carbon footprint is the right technique of waste management The most commonly known process is called Recycling which consists of collecting used materials reprocessing the waste material into a secondary material into its raw ingredients in order to be able to use this material for new product production In other words creating a new durable product that is made of waste is the ideal choice to support the environmentally friendly way of living and contributing to our planet The current times just make it a necessity for every business to act ethically and to have sustainable processes in place that contribute to the purpose economy It is relevant to change the primary goal of businesses from profit maximization no matter the costs to first having sustainable methods in place that protect humanity and future generations This leads to the main purpose of this essay consisting of explaining the meaning of purpose economy and sustainable development to business In short the purpose

economy consists of the idea of having a business which has a green economy that helps the planet instead of destroying it. Further, the sustainability consists of three main aspects: Social, Ecological, and Economic, and aims on acting in an ethical way with the purpose of not harming future generations. This will be properly illustrated by the help of using a real case: the US clothing brand Patagonia. Patagonia is an US clothing brand that was founded by Yvon Chouinard in the year 1973 and is known for producing sustainable outdoor clothing. Since the whole clothing industry contributes up to 10% of the pollution which worsens the climate crisis, this company illustrates a perfect example of how to be a leading model for other companies of running a sustainable business.
