Rethinking Language Education in the Age of Generative AI Zhongfeng Tian, Chaoran Wang, 2025-05-20 Rethinking Language Education in the Age of Generative AI bridges the gap between theory research and practice in AI and language education Through conceptual pieces empirical

studies and practical applications this book provides critical insights and implications for reimagining language education in the age of generative AI. The contributors explore a wide range of issues, reflections, and innovations in AI and language education across diverse contexts including English as a Second Language (ESL), English as a Foreign Language (EFL), foreign language learning, postsecondary pathways, programs for international students, and language teacher education programs. Topics examined include critical AI literacy, GenAI-informed second language teaching and assessment, teacher and student perceptions, tool development for language learning, as well as ethical considerations, policies, and guidelines. The book incorporates interdisciplinary perspectives such as L2 foreign language studies, education, and applied linguistics, as well as global insights from countries like the United States, Canada, South Korea, Thailand, Indonesia, and the Philippines. This book is essential for students and researchers seeking to leverage AI to enhance language teaching and learning in innovative, critical, ethical, and responsible ways.

Impacts of Globalization and Innovation in Mathematics Education Njurai, Evelyn, Uworwabayeho, Alphonse, 2024-07-18. In the face of emerging challenges in the field of mathematics education, educators and researchers find themselves navigating the complexities of globalization and innovations. As classrooms become more diverse and educational landscapes evolve, there is a need for an understanding of the multifaceted impacts of these forces. The very essence of mathematics education is shifting, influenced by global trends, cultural dynamics, and technological advancements. It is within this context that *Impacts of Globalization and Innovation in Mathematics Education* offers a profound exploration of the challenges and opportunities that arise in this era. One of the central predicaments faced by educators and scholars is the dynamic nature of globalization and innovation, which introduces unprecedented complexities in mathematics education. While cultural diversity in classrooms brings valuable perspectives, it also poses challenges in developing inclusive and effective teaching strategies. The integration of innovative practices faces resistance due to cultural conflicts and identity issues. Additionally, the fast-paced changes in global trends and the dissemination of information through media influence how mathematics education is perceived and practiced. This creates a demand for a thorough examination of the relationship between globalization, innovation, and the field of mathematics education.
