Technology Strategy Nigel Walton, Neil Pyper, 2019-09-21 This dynamic and beautifully written textbook takes a modern and innovative approach to strategy by placing technology at its heart bridging the gap between general strategy texts and specialist technology and innovation literature It addresses the challenges and opportunities presented to organisations by disruptive technological change and takes into account the navigation of uncertain business environments In addition to examining more established concepts and theories the text also explores new disruptive business models and non traditional approaches to strategy development such as effectuation the Business Model Canvas and prediction logic This comprehensive and critical approach is supported by a rich assortment of practical examples and cases drawn from different sectors and a range of exciting companies from all over the world helping students and practitioners to apply theory to practice This will be an essential core text for modules on technology strategy and innovation at upper undergraduate postgraduate and MBA levels and invaluable reading for senior executives and aspiring managers who seek to understand how to implement strategy in a volatile disruptive environment

Robots That Love Judith A. Markowitz, 2025-10-30 In a world of increasingly sophisticated AI the relationship between creator and creation has shifted Robot lovers coexist with humans and the boundaries of emotion and consciousness are blurred This book considers the fundamental challenge of imbuing robots with the capacity to experience love delving into the consequences of loving robots that can only feign reciprocation and philosophical questions about sentience and consciousness Other forms of artificial lovers are also discussed ranging from ChatGPT and Samantha from the 2013 film Her to a variety of sex dolls monsters golems and romanceable characters in dating simulation games Such entities encompass an array of sexual and gender identities as well as gender biases involved in creating the perfect artificial companion and developing AI systems These biases often perpetuated by deep learning algorithms underscore the need for critical reflection amid the evolution of AI
