general quality of life by incorporating the most recent technological developments Conversational Artificial Intelligence
Romil Rawat,Rajesh Kumar Chakrawarti, Sanjaya Kumar Sarangi, Anand Rajavat, Mary Sowjanya Alamanda, Kotagiri
Srividya, K. Sakthidasan Sankaran, 2024-01-30 This book reviews present state of the art research related to the security of
cloud computing including developments in conversational AI applications It is particularly suited for those that bridge the
academic world and industry allowing readers to understand the security concerns in advanced security solutions for
conversational AI in the cloud platform domain by reviewing present and evolving security solutions their limitations and
future research directions Conversational AI combines natural language processing NLP with traditional software like
chatbots voice assistants or an interactive voice recognition system to help customers through either a spoken or typed
interface Conversational chatbots that respond to questions promptly and accurately to help customers are a fascinating
development since they make the customer service industry somewhat self sufficient A well automated chatbot can decimate
staffing needs but creating one is a time consuming process Voice recognition technologies are becoming more critical as AI
assistants like Alexa become more popular Chatbots in the corporate world have advanced technical connections with clients
thanks to improvements in artificial intelligence However these chatbots increased access to sensitive information has raised
serious security concerns Threats are one time events such as malware and DDOS Distributed Denial of Service assaults
Targeted strikes on companies are familiar and frequently lock workers out User privacy violations are becoming more
common emphasizing the dangers of employing chatbots Vulnerabilities are systemic problems that enable thieves to break
in Vulnerabilities allow threats to enter the system hence they are inextricably linked Malicious chatbots are widely used to
spam and advertise in chat rooms by imitating human behavior and discussions or to trick individuals into disclosing personal
