showcased their portrayals are undermined by socially awkward behavior or their intimate relationships are doomed to perpetual failure While Hollywood claims to offer a different more evolved look at women these movies and shows often just repackage old character types that still downplay the intelligence and savvy of women In Smart Chicks on Screen Representing Women s Intellect in Film and Television Laura Mattoon D Amore brings together an impressive array of scholarship that interrogates the portrayal of females on television and in movies Among the questions that the volume seeks to answer are In what ways are women in film and television limited or ostracized by their intelligence How do female roles reinforce standards of beauty submissiveness and silence over intellect problem solving and leadership Are there women in film and television who are intelligent without also being objectified The thirteen essays by international interdisciplinary scholars offer a wide range of perspectives examining the connections and disconnections between beauty and brains in film and television Smart Chicks on Screen will be of interest to scholars not only of film and television but of women s studies reception studies and cultural history as well

Science and the Mind of the Maker Melissa Cain Travis,2018-07-03 Are We an Accident or Not The question of cosmic origins and our place in the grand scheme of things has been debated for millennia Why do we exist Why does anything exist at all Today s popular narrative based on advancements in science is that it all happened by natural random processes Melissa Cain Travis points to powerful evidence that the opposite is true that cosmology astronomy biochemistry and other disciplines strongly support what she calls The Maker Thesis which explains the origin rationality and intricacy of nature and the human mind s capacity to comprehend it Our universe is made up of numerous complex systems of order that both interact and coexist with each other as if in a carefully choreographed dance Follow along on a fascinating journey about how the structure of nature and the mind of man resonate in ways that point to a Maker who fully intended the astounding discoveries being made in the natural sciences today
