Cosmic Game:

Welcome to Heaven Gregory Holloman, 2022-08-12 I write what I write and have written what I wrote not to establish some truth so that you may have something to create a belief around What I bring to the surface for your observation may damage the foundation upon which beliefs are built A belief requires there be a tiny element of truth involved A belief is superstitious in nature There are many truths located in books in libraries around the world They are waiting to be discovered to make a difference on the planet I assert that there have been only 5 major changes on the face of this planet under our sun in the last sixty thousand years and there is no difference to speak of The five major changes are Our cave dwelling Our fashion Our mode of transportation Our attempted means of communication Our ways of killing each other off I assert today that there is still man s inhumanity to man There are still wars and rumors of wars There are the rich there s the poor There is pestilence incurable disease and starvation There are unscrupulous lawyers unethical doctors and corrupt politicians You still have dirty police officers and scandalous governments There have been preachers teachers scientists and men of vision There is incest hunger the homeless killings and rape There are spiritual minds paradise money entertainers battered families and religiousness It has been this way since recorded history My proof and evidence are in any history book and any bible This is not about another truth Neither is this for your agreement and or approval I write what I write and have written what I wrote to bring a new language to the surface for your observation This new language is not a language such as English or Spanish or German or any other language with a name This new language is the language of languages If language were a tool then this new language would be the tool of tools With this new language I will attach control levers knobs and buttons to the thing that has been driving us linguistic beings And the thing that has us doing what we do This has been dancing the dance of life for the last 4 4 billion years The thing that has us creating a world for ourselves today is a past conversation based on hope about having a better tomorrow instead of simply having an excellent day today Thanks for stopping by

The Cosmic Game Stanislav Grof, 1998-01-01 The Cosmic Game discusses the broadest philosophical metaphysical and spiritual insights gleaned in Grof s research concerning human nature and reality addressing the most fundamental questions human beings have asked about the nature of existence since time immemorial Insights from research into nonordinary states of consciousness portray existence as an astonishing play of the cosmic creative principle that transcends time space linear causality and polarities of every kind and suggest an identity of the individual psyche in its furthest reaches with the universal creative principle and the totality of existence This identity of the human being with the Divine is the ultimate secret that lies at the core of all great spiritual traditions

Unified Reality Theory Steven Kaufman, 2015-12-04 Unified

Reality Theory demonstrates that the source of reality is a universal consciousness and that we are in no way separable from that source and so in no way truly separable from each other or any other aspect of reality I recommend this book to anyone interested in understanding the nature of reality and their place in it Deepak Chopra Unified Reality Theory describes how all reality evolves from an absolute existence It also demonstrates that this absolute existence must have consciousness as an attribute that is intrinsic to its being Thus Unified Reality Theory shows that consciousness rather than being a product of the evolution of physical reality is itself the source of what we experience as physical reality and that physical reality is itself but one aspect of an evolving universal consciousness Unified Reality Theory shows that most fundamentally this absolute consciousness existence evolves into reality by means of a single process self relation That is consciousness existence becomes reality by forming relationships with itself analogous in a very limited way to what happens to a rubber band that is twisted upon itself i e it remains whole while differentiating into other forms Thus Unified Reality Theory demonstrates that reality is a state of existential self relation The idea that the universe consists of existence which has formed relationships with itself isn't new Taoists have understood this idea for at least a couple of thousand years What's new here is the presentation of this idea in the form of a detailed and defined structural model that correlates with the behavior of physical reality as described by science in general and physics in particular Ultimately Unified Reality Theory uses science and logic to make the case that God exists as a pervasive and absolute consciousness that transcends the realities of space and time and that we as well as everything else are that
