**Ancient Greek Cosmogony** Andrew Gregory, 2008-01-03 Ancient Greek Cosmogony is the first detailed comprehensive account of ancient Greek theories of the origins of the world. It covers the period from 800 BC to 600 AD beginning with myths concerning the creation of the world, the cosmogonies of all the major Greek and Roman thinkers and the debate between Greek philosophical cosmogony and early Christian views. It argues that Greeks formulated many of the perennial problems of philosophical cosmogony and produced philosophically and scientifically interesting answers. The atomists argued that our world was one among many worlds and came about by chance. Plato argued that it is unique and the product of design. Empedocles and the Stoics in quite different ways argued that there was an unending cycle whereby the world is generated, destroyed and generated again. Aristotle on the other hand argued that there was no such thing as cosmogony and the world has always existed. Reactions to and developments of these ideas are traced through Hellenistic philosophy and the debates in early Christianity on whether God created the world from nothing or from some pre-existing chaos. The book examines issues of the origins of life and the elements for the ancient Greeks and how the cosmos will come to an end. It argues that there were several interesting debates between Greek philosophers on the fundamental principles of cosmogony and that these debates were influential on the development of Greek philosophy and science.      **Cosmogony and**

**Cosmology** Mohammad Ali Amir-Moezzi, 1993      *Cosmology, Cosmogony, and Myth* Tanya A. Silva, 2003      *The Daoist Tradition* Louis Komjathy, 2013-06-20 Using a historical, textual and ethnographic approach, this is the most comprehensive presentation of Daoism to date. In addition to revealing the historical contours and primary concerns of Chinese Daoists and Daoist communities, *The Daoist Tradition* provides an account of key themes and defining characteristics of Daoist religiosity, revealing Daoism to be a living and lived religion. Exploring Daoism from a comparative religious studies perspective, this book gives the reader a deeper understanding of religious traditions more broadly. Beginning with an overview of Daoist history, *The Daoist Tradition* then covers key elements of Daoist worldviews and major Daoist practices. This is followed by a discussion of the importance of place and sacred sites as well as representative examples of material culture in Daoism. The work concludes with an overview of Daoism in the modern world. The book includes a historical timeline, a map of China, 25 images, a glossary, text boxes, suggested reading and chapter overviews. A companion website provides both student and lecturer resources. <http://www.bloomsbury.com/the-daoist-tradition> 9781441168733      **Encyclopaedia of Religion and**
