The Mesotron Component in Cosmic Rays Vernal Josephson, 1942 Knowledge of Cosmic Rays dates back to the early days of research in radioactivity As in all fields of research the collection of accurate information about Cosmic Rays has been slow This has been due especially in the earlier period to the lack of apparatus capable of obtaining the necessary data and as the field of Nuclear Physics was new no adequate theories had been developed Within the past two decades two valuable pieces of apparatus have been developed for the experimental study of Cosmic Rays These instruments are the coincidence counter circuits employing Geiger Muller G M counters and the counter controlled cloud chamber With these instruments many valuable and accurate data have been obtained *Neutral Mesotrons in Cosmic Rays?* B.. Trumpy, T. Bjordal, 1942

Rays Daniela Monaldi, 2005 In the 1938-1946 period cosmic ray studies, nuclear physics and quantum field theory merged in the cluster of researches related to the spontaneous decay of the particle then called mesotron or meson. For the first time an elementary particle was observed to be spontaneously unstable. The conceptual framework and the material apparatus for the study of this new phenomenon had to be created and stabilized. Throughout the last part of World War II and its immediate aftermath, a team of young Italian physicists pursued and achieved the direct observation of mesotron decays. They worked within the Italian cosmic ray tradition while successfully innovating upon its instrumentation and experimental methods. The acquired control of mesotron decay together with the then current understanding of the nature of mesotrons directed them to the investigation of another new phenomenon: the capture of mesotrons by atomic nuclei. The outcome of their experiment was unexpected and had far-reaching consequences. *National Bureau of Standards Circular*, 1947 *Electrons, Protons, Photons, Neutrons, Mesotrons and Cosmic Rays*, *The Differential Range Spectrum of Cosmic Ray-mesotrons* Lawrence Seymour Germain, 1949
