novel definition of this phenomenon and examines the forces that drive international initiatives It then examines and explains the internationalization paradox the observation that despite evidence that many international initiatives fail to deliver what they promise for the heads of HEIs they nevertheless remain at the top of the agenda In turn the second part of the book develops a unifying framework that identifies alternative models of internationalization and explains how they relate to one another Based on this framework the book presents a model of the truly global HEI whose mission is to learn from the world rather than teach the world what it knows The book s central thesis is that it is unlikely that HEIs will be able to transform themselves into truly global HEIs because of historical and organizational barriers rather than a shortage of resources or a lack of visionary leadership The book concludes that most HEIs should refrain from claiming that their aim is to become global institutions and should instead focus on the successful implementation of an import export model of internationalization that calls for initiatives such as the internationalization of the curriculum the creation of student and faculty exchange programs and the participation in international academic and research partnerships Any attempt to transform themselves into truly global institutions is unlikely to succeed and may distract them from their fundamental mission to educate their home based students and help them become effective global citizens **Normal Instructor*,1906**
