**Child and Society** H. Sapiro,1947      *The Laszlo Chronicle* Gyorgyi Szabo,2017-01-24 This study analyses the fifty year evolution of Ervin Laszlo s contribution to science and philosophy It records the major turning points in his thinking and discusses who and what influenced this evolution and with what result Laszlo s search for answers to questions such as man s relationship to nature and the cosmos and the nature of underlying factors of evolution which connect all things were not satisfied by working only on the basis of the General Evolutionary Systems Theory Wittgenstein said In every serious philosophical question uncertainty extends to the very roots of the problem We must always be prepared to learn something totally new Laszlo did discover something entirely new the theory of the information field after immersing himself in a range of areas of study such as cosmology consciousness studies quantum physics metaphysics and various Eastern traditions The integration of his earlier works with his more recent studies lies behind his explanation of the existence of the Akashic Field The Akashic Field is a term that refers to an interactive universe communicating in a subtle manner which connects everything with every other thing everywhere This is a pure information field where communication takes place without the need for the transportation of physical energy thus interaction can occur instantaneously regardless of distance and time Coherence and consciousness are the bases of Laszlo s Akashic field He proposed a system theoretic paradigm which focuses on a general understanding of the cosmos and the implications for entities such as human beings This entails the observation and explanation of human and cosmic evolution as viewed in unity or inter connectedness where macro and micro are essentially interlinked Laszlo s philosophical work extends to sociology when describing concurrent worldwide issues closely related to the existence of the Akashic Field His humanist ideals are evidenced by his efforts to help humans understand the context and causes for their recent challenges and the possibilities that may lie ahead Ervin Laszlo s half century of exceptional philosophical work gives us the most coherent picture of the nature of the world to date      *Society and Culture* ,1987      *Cosmos, Man and Society* Edmond Szekely,2025-06-16 COSMOS MAN AND SOCIETY considers every field of human knowledge and presents the first complete synthesis that closely relates each part of life into a harmonious and intelligent whole extending from the early history of man to modern cosmic science and including in its scope ethnology

medicine world politics and economics ethics and all human culture The aim of *Cosmos Man and Society* is to teach and make known the new science of Paneubiotics which shows the way to live the maximum good life in every respect and which will ultimately lead to the creation of a perfect human race Szekely presents a visionary framework that seeks to reintegrate the fragmented domains of science philosophy ecology and spirituality Drawing on sources as diverse as ancient Essene texts Eastern cosmologies and Western metaphysics Szekely articulates a comprehensive worldview Paneubiotics where cosmic order human consciousness and societal well being are understood as inseparably linked His method blends textual exegesis comparative cosmology and natural science offering a bold synthesis that anticipates later developments in systems theory and deep ecology This work occupies a unique place in 20th century intellectual history bridging perennial philosophy with ecological humanism It challenges both reductionist materialism and abstract idealism by proposing a living participatory cosmos in which human beings are active agents of harmony or dissonance As a synthesis rooted in philological rigor and visionary insight *Cosmos Man and Society* remains an essential reference for scholars exploring integrative approaches to the human condition within the natural world
