Counseling Harold B. Pepinsky, Pauline Nichols Pepinsky, 1954 In this book we contend that the psychologist who engages in counseling can be both practitioner and scientist that he can contribute to knowledge while helping clients Admittedly few counselors are theorists in the strict sense of the term but inevitably every counselor will bring to his work with clients certain assumptions He will have some underlying rationale vague and implicit though it may be for what he does some hunches about what different clients will do in different situations and some general ideas about the counseling procedures that are apt to be effective If he is to make claims for the efficacy of his practice he must be willing to subject these ideas to empirical test Only then can he begin to find out whether what he has done works and how it works Only as the counselor makes communicable what he does can his knowledge be imparted to others This book begins with our argument for reconciling the dual roles of practicing counselor and researcher and proceeds to a short guided tour of current empirical and theoretical approaches to counseling We do not insist upon the adoption of any particular approach to counseling But we do urge the practicing counselor to make explicit his own

assumptions and to use them in making verifiable predictions about the observable behavior of clients and counselor

Doyle,1992 This book was written with students in mind The first six chapters may be read independently by students The information provided in these chapters may be further developed by classroom discussions or supplementary lectures that can go into any of these topics in greater detail The communication skills discussed in the last four chapters are designed to be used in a skill building course The exercises in these chapters need to be studied under the direction of a skilled counselor I have tried to present the subject matter in a relatively informal writing style The chapters were pretested with my own students who were asked to provide feedback and pose questions about any concepts that were not completely understood An Introduction to the Profession of Counseling Frank A. Nugent,1990 **Assessment in Counselling** Judith Milner,Patrick O'Byrne,2017-03-14 Whilst assessment has long been central to the counselling process with the recent moves towards evidence based practice and increased regulation it is taking an increasingly pivotal role in service provision This important new text helps clarify the nature and purpose of assessment in counselling It explores the theoretical underpinnings of assessment across the core therapeutic schools and addresses critical differences in the meanings and importance deferred to it It will be invaluable reading for all trainees as well as for practitioners wishing to gain a broad insight into therapeutic practice across the boundaries of the many therapeutic models
