Counseling Research And Program Evaluation:

Practical Approaches to Applied Research and Program Evaluation for Helping Professionals Casey A. Barrio Minton, A. Stephen Lenz, 2019-05-01 Practical Approaches to Applied Research and Program Evaluation for Helping Professionals is a comprehensive textbook that presents master's level counseling students with the skills and knowledge they need to successfully evaluate the effectiveness of mental health services and programs. Each chapter aligned with 2016 Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards guides counseling students through study design and evaluation fundamentals that will help them understand existing research and develop studies to best assess their own applied research questions. Readers will learn the basics of research concepts as applied to evaluative tasks, the art of matching evaluative methods to questions, specific considerations for practice-based evaluative tasks, and practical statistical options matched to practice-based tasks. Readers can also turn to the book's companion website to access worksheets for practitioner and student planning exercises, spreadsheets with formulas for basic data analysis, a sample database, PowerPoint outlines, and discussion questions and activities aligned to each chapter. *Counseling Research and Program Evaluation* Hadley, Mitchell, 2007-02 **Counseling Research and Program Evaluation** Robert G. Hadley, Lynda K. Mitchell, 1995 This book shows the necessity for research in counseling and its applicability to the counseling process using specific examples. The authors help students overcome their apprehension about research and emphasize its value. Each chapter includes practical exercises designed to provide students with interesting and engaging learning experiences related to the concepts presented in the text. The book also includes thorough coverage of evaluation. Reimagining Research Trevor J. Buser, Sandy Gibson, 2023-06-16 Reimagining Research centers antiracist research practices and showcases real-world research in counseling practice. The book focuses on the research competencies that matter most to counselors, with each chapter co-authored by practicing counselors and counselor educators. Each chapter reflects diversity in authorship and opens with a potential for practice case study that illustrates a research-related challenge in the practice of counseling. Online resources including a focus group interview sample transcripts of qualitative interviews, video demonstrations of statistical techniques, and other documents used in research processes present these potentials for practice in experiential ways. Chapters close with attention to resources that are readily available for counselors who want to implement these practices, such as evidence-based practice guidelines, open access journals, and open access statistical tools.
