Godfrey, 2012-12-06 We share with our colleagues the difficulties presented by the increasing volume of drugs available for our use in the care of patients The introduction of new and effective preparations has added to our problems both in keeping up to date and paradoxically in their proper selection and use There are yet further difficulties in general practice because of the nature of the diseases and situations encountered under tainties in the preciseness of diagnosis in the likely course and outcome of diseases and in the particular characteristics of the individual patient We have attempted to ease these difficulties by adopting a logical but Simplistic schematic approach to the choice of medicines for 14 selected common conditions Our approach includes statements of knowledge and understanding of the conditions analyses of the most suitable available drugs setting objectives and principles for management suggested treatment plans The suggestions are of course our own and may not be completely acceptable to some of our readers but in creating this schematic approach our intention has been that those who follow it will be able to select from alternative preparations with satisfactory results      **The Common Sense of Medicine; Or, The Art of Healing in a Nutshell** F.
