*Communicating Family and Consumer Sciences* Elizabeth J. Hitch, June Pierce Youatt, 1995      *Handbook of Marriage and the Family* Gary W. Peterson, Kevin R. Bush, 2012-09-14 The third edition of *Handbook of Marriage and the Family* describes, analyzes, synthesizes, and critiques the current research and theory about family relationships, family structural variations, and the role of families in society. This updated Handbook provides the most comprehensive state-of-the-art assessment of the existing knowledge of family life with particular attention to variations due to gender, socioeconomic, race, ethnic, cultural, and life style diversity. The Handbook also aims to provide the best synthesis of our existing scholarship on families that will be a primary source for scholars and professionals but also serve as the primary graduate text for graduate courses on family relationships and the roles of families in society. In addition, the involvement of chapter authors from a variety of fields including family psychology, family sociology, child development, family studies, public health, and family therapy gives the Handbook a multidisciplinary and interdisciplinary framework.

*Seeing The Hidden Minority* Andrea L. Tyler, Stephen Hancock, Sonya C. Richardson, 2020-06-01 The participation of Black students in science, technology, engineering, and mathematics (STEM) fields is an issue of national concern. Educators and policymakers are seeking to promote STEM studies and eventual degree attainment, especially those from underrepresented groups including Black students, women, economically disadvantaged, and students with disabilities. Literature shows that this has been of great interest to researchers, policymakers, and institutions for several years. Nettles, Council of Graduate School, CGS, 2009. National Science Foundation, NSF, 2006. Therefore, an extensive understanding of access, attrition, and degree completion for Black students in STEM is needed. According to Hussar and Bailey, 2014, the Black and Latino postsecondary enrollment rates will increase by approximately 25% between 2011 and 2022. It is critical that this projected enrollment increase translates into an increase in Black student STEM enrollment, persistence, and consequently STEM workforce. In view of the shifting demographic landscape, addressing access, equity, and achievement for Black students in STEM is essential. Institutions, whether they are secondary or postsecondary, all have unique formal and informal academic structures that students must learn to navigate in order to become academically and socially acclimated to the institution. Tyler, Brothers, Haynes, 2014. Therefore, positive experience with the academic environment becomes critical to the success of a student persisting and graduating. Understanding and addressing the challenges faced by Black students in STEM begins with understanding the complexities they face at all levels of education. A sense of urgency is now needed to explore these complexities and how they impact students at all educational levels. This book will explore hidden figures and concerns of social connectedness, mentoring practices, and identity constructs that uncover unnoticed talent pools and encourage STEM matriculation among Black STEM students in preK-12 and post-secondary landscapes.

Section 1: Socialization. Social discourse concerning how male and females are supposed to enact their socially sanctioned roles is being played out daily in educational institutions.

Individuals who chose STEM education and STEM careers are constantly battling this social discourse It is necessary for P 20 STEM spaces to examine and integrate understanding of socialization within the larger societal culture for systemic and lasting change to happen Section 2 Mentoring A nurturing process in which a more skilled or more experienced person serving as a role model teaches sponsors encourages counsels and befriends a less skilled or less experienced person for the purpose of promoting the latter s academic professional and or personal development Section 3 Identity Research focusing on identity constructs in STEM has become more common especially as it relates to student retention and attrition

Researchers have been able to use identity as a way to examine how social stigma can cause students to dis identify within STEM spaces **Books in Print Supplement** ,2002 *American Book Publishing Record* ,2001 **El-Hi Textbooks &**
