Communication And Assertion Skills For Older Persons:

Communication and Assertion Skills for Older Persons Leilani Doty, 1987 First published in 1987 Routledge is an imprint of Taylor Francis an informa company Communication and Assertion Skills for Older Persons Leilani Doty, 2018-10-24 First published in 1987 The chapters in the text focus on helping the reader meet these goals and objectives Build self confidence improve social interaction Listen to oneself and others Give and receive positive feedback Express personal feelings opinions and experiences Respect one's own personal rights Respect the rights of others Increase the practice of selective assertiveness Topics covered are transition in life personal awareness relationships of family members and friends specific communication skills selective assertiveness and reflection on the learning experience *Introduction to Educational Gerontology* Ronald H. Sherron, D. Barry Lumsden, 2013-11-12 Educational gerontology is the study of the changes in the learning process caused by old age This new edition provides an update of developments in this field of research The volume probes topics such as implications for education for the aging reminiscence methods of teaching social exchange and equal opportunity **The Older Adult as Learner** D. Barry Lumsden, 1985 Language, Discourse and Social Psychology A. Weatherall, B. Watson, C. Gallois, 2007-03-28 Language and communication are central features of social behaviour So it is somewhat surprising that the social psychological study of this area has a relatively short history In this book a leading group of scholars overview the history theories and methods of the field and showcase the latest developments in cutting edge empirical work Death Attitudes and the Older Adult Adrian Tomer, 2000 This innovative and informative new text bridges the fields of gerontology and thanatology *Counseling Older Persons: Basic helping skills for service providers*, 1981 **Psychological Treatment of Older Adults** Michel Hersen, Vincent B. Van Hasselt, 2013-06-29 This multiauthored introductory textbook could not have been conceived or brought to fruition 10 or 15 years ago Indeed at that time relatively little attention was accorded to the psychological needs of older adults The general tenor of the field then was that older adults would not benefit from psychological intervention As we now know this was a faulty assumption that has been discredited with empirical data Indeed clinical research data adduced primarily in the last decade clearly documents that older adults do benefit from specific psychotherapies that are tailored to their unique presentation of symptoms Given the explosion of interest in this area as evinced by increased investigatory activity national funding and media attention and the increased number of masters and doctoral level courses devoted to this topic we felt that the time was right for a textbook in the area Such flurry of activity also has been fueled by statistics showing how our population by the year 2030 will consist of 30% who are senior citizens Moreover since 12% of older adults in the community are estimated to have diagnosable psychiatric disorders and 40% to 50% of older adult medical inpatients have a concomitant psychiatric disorder the task for clinicians in the next century will be overwhelming **Handbook of Psychological Skills Training** William T. O'Donohue, 1995 **Older Adult Services**, 1990 *The SAGE Encyclopedia of Abnormal and Clinical*

Psychology Amy Wenzel, 2017-03-16 Abnormal and clinical psychology courses are offered in psychology programs at universities worldwide but the most recent major encyclopedia on the topic was published many years ago Although general psychology handbooks and encyclopedias include essays on abnormal and clinical psychology such works do not provide students with an accessible reference for understanding the full scope of the field The SAGE Encyclopedia of Abnormal and Clinical Psychology a 7 volume A Z work print and electronic formats is such an authoritative work Its more than 1 400 entries provide information on fundamental approaches and theories various mental health disorders assessment tools and psychotherapeutic interventions and the social legal and cultural frameworks that have contributed to debates in abnormal and clinical psychology Key features include 1 400 signed articles contained in 7 volumes and available in choice of print and or electronic formats Although organized A to Z front matter includes a Reader s Guide grouping related entries thematically Back matter includes a Chronology Resource Guide Bibliography and detailed Index Entries conclude with References Further Readings and Cross References to related entries The Index Reader s Guide themes and Cross References between and among entries all combine to provide robust search and browse features in the electronic version
