Braithwaite, Julia T. Wood, 2000 The many narrative cases in this book offer dramatic real life snapshots of interpersonal theory in action Written by established communication scholars and reflecting carefully conducted research each case helps you apply abstract principles to specific situations people and relationships As you read these cases you'll also learn to appreciate how multiple communication dynamics work together to shape what happens in human interactions for example how a case focusing on self disclosure also gives you insights into such issues as timing context and style of communication And as you identify patterns revealed in the cases you'll develop the ability to detect these patterns in your own interactions and ultimately make more informed choices about which patterns to foster and avoid in your interpersonal relationships      Communicating About Health: Current Issues and Perspectives Athena DuPré, 2005 This text provides a research based thorough overview of health communication balancing theory with practical advice and examples that encourage students to further develop their own communication skills In a broad survey of the field approached from the perspectives of both caregiver and patient it offers solid coverage of the history of health care an examination of culture's role in health and healing and a look at current issues and challenges facing health care The new edition includes expanded coverage of diversity among patients and of the impact

of technology on health care communication today      *Using the Strengths Perspective in Social Work Practice* Morley D. Glicken, 2004 *Using the Strengths Perspective in Social Work Practice* explains the major ideas behind the strengths perspective and then demonstrates through case studies and discussion how helping professionals can apply the strengths perspective in practice. The book is very research oriented and includes a great deal of new research on topics such as natural healing in addicted clients, self management of mental illness, a positive view of change in clients diagnosed with mental illness, the effectiveness of self help groups, research on resilience in children and adults who have experienced life traumas, research on the importance of spirituality and religious involvement, and new research data on the helping process. Most of the research used in this book has been published since 2000. The book has a unique feature: a critical response section at the end of every chapter in which clinicians and researchers have an opportunity to critically respond to ideas presented. This in effect provides an evidence based approach to the material in the book. Because the book shows the application of the strengths perspective in practice, Dr Glicken includes examples showing how to apply the approach with complex client problems including abuse, domestic violence, mental illness, addictions, and other complex problems often dealt with by clinicians in the helping professions. The book is written for the helping professions and includes the work of Martin Seligman in Psychology on learned optimism, Robert Putnam on community life in America, and Dennis Saleebey, one of the original writers on the strengths perspective in social work.      *Official Program ... BOOK JACKET      **Annual Convention** Association for Education in Journalism and Mass Communication. Annual Convention, 1996      Psychology and Education, 2005      **Forthcoming Books** Rose Arny, 1996-06      Persuading People To Have Safer Sex Richard M. Perloff, 2000-11-01 *Persuading People to Have Safer Sex* offers a lucid in depth, student friendly, and academically thorough discussion of AIDS prevention and health persuasion. In so doing, it provides an introduction to the ways that social scientific research can be brought to bear on a daunting health problem. Covering many aspects of the AIDS crisis, the book introduces readers to the severity of the AIDS problem and explains the epidemiology of the disease. It discusses why persuasion is so important, explicates cognitive theories of AIDS prevention, and notes the role emotions and communication play in safer sex prevention. It also discusses functions that unsafe sex plays in people's lives, why people, notably minority women, frequently choose to engage in unsafe sex, and social factors underlying the spread of AIDS in urban America and portions of Africa. As a resource for introducing students to the role that theory and research play in health communication and psychology, the volume is appropriate for use in communication, journalism, social psychology, and public health courses, and will be of value to scholars, researchers, and all

who seek to understand the use of persuasion in changing behavior      **US-Mexico Border Health** J.
