## **Communication With The Cancer Patient Information And Truth Annals:**

*Ethical Issues in Cancer Patient Care* Peter Angelos, 2013-04-17 This book addresses a variety of ethical issues that arise in the care of oncology patients Many volumes have been written on medical ethics in the past 30 years However few have focused on ethical issues specific to the care of cancer patients This book brings together such a focused examination The contributors are experienced clinicians ethicists medical humanists and medical educators The issues raised have direct relevance to the care of oncology patients in treatment as well as research settings The chapters address issues that are central to contemporary medical practice and medical ethics inquiry Any practicing clinician will be well aware of the problems of communication and how uncertainty cross cultural issues and religious influences can impact patient care The limits of care and the role of advance directives and palliative care are common issues that must be addressed in treating patients at the end of life For oncologists and oncology patients participation in clinical trials may be a thorny topic especially when phase I clinical trials are being considered The impact of managed care and reimbursement issues cannot be avoided in the contemporary patient care and similarly cannot be neglected when considering the ethical ramifications raised No discussion of ethics in oncology can be complete without attention to the specific challenges raised by the pediatric patient with cancer All of these topics are explored by the contributors to this book     Biomedicen and Beatitude Nicanor Pier Giorgio Austriaco, 2021-06-25 This timely and up to date new edition of Biomedicine and Beatitude features an entirely new chapter on the ethics of bodily modification It is also updated throughout to reflect the pontificate of Pope Francis recent concerns including ethical issues raised by the COVID 19 pandemic and feedback from the many instructors who used the first edition in the classroom     **The Picture of Health** Henri Colt, Silvia Quadrelli, Friedman Lester, 2011-05-10 Film and literature have long been mined for interesting examples and case studies in order to teach biomedical ethics to students This volume presents a collection of about 80 very brief accessible essays written by international experts from medicine social sciences and the humanities all of whom have experience using film in their teaching of medical ethics Each essay focuses on a single scene and the ethical issues it raises and the volume editors have provided strict guidelines for what each essay must do while also allowing for some creative freedom While some of the films are obvious candidates with medical themes Million Dollar Baby The Diving Bell and the Butterfly some are novel choices such as Pan s Labyrinth or As Good as it Gets The book will contain several general introductory chapters to major sections and a complete filmography and cross index at the end of the book where readers can look up individual films or ethical issues     Principles of Biomedical Ethics Tom L. Beauchamp, James F. Childress, 2001 For many years this has been a leading textbook of bioethics It established the framework of principles within the field This is a very thorough revision with a new chapter on methods and moral justification     Death Foretold Nicholas A. Christakis, 2001-04 This groundbreaking book explains prognosis from the perspective of doctors examining why physicians are reluctant to predict the future how doctors use prognosis the symbolism

it contains and the emotional difficulties it involves Drawing on his experiences as a doctor and sociologist Nicholas Christakis interviewed scores of physicians and searched dozens of medical textbooks and medical school curricula for discussions of prognosis in an attempt to get to the core of this nebulous medical issue that despite its importance is only partially understood and rarely discussed Highly recommended for everyone from patients wrestling with their personal prognosis to any medical practitioner touched by this bioethical dilemma Library Journal starred review T he first full general discussion of prognosis ever written A manifesto for a form of prognosis that s equal parts prediction an assessment of likely outcomes based on statistical averages and prophecy an intuition of what lies ahead Jeff Sharlet Chicago Reader S

ophisticated extraordinarily well supported and compelling Christakis argues forcefully that the profession must take responsibility for the current widespread avoidance of prognosis and change the present culture This prophet is one whose advice we would do well to heed James Tulsky M D New England Journal of Medicine Communication with the Cancer Patient Antonella Surbone,Matjaž Zwitter,1997 In many parts of the world seriously ill patients are not informed of their diagnoses Consequences of this for the patient are not being informed about the therapy and its possible side effects and ultimately deprivaion of autonomy Telling the truth to a patient is not simply a matter of providing information Rather the truth is a matter of two way communication the result of a relationship between doctor and patient that develops over time in the context of a given culture In this volume oncologists in different countries give their perceptions of how truth telling is handled in their cultures Clinical Psycho-Oncology Luigi Grassi,Michelle Riba,2012-05-18 This international primer on psycho oncology spans settings of care as well as regional boundaries Designed to be easy to read with informaton clearly displayed in concise tables and boxes accompanied by clinical vignettes the book provides clear practical guidance on all aspects of the psychological care of patients with cancer Both trainees and practitioners will find it useful in the clinic as well as a resource for continued professional development *Psycho-Oncology* Jimmie C. Holland,2010-03-22 Psycho Oncology was the first comprehensive text in the field of psychosocial oncology and remains the gold standard today Written by 67 internationally known psychiatry and palliative care experts the resource is truly an essential reference for all providers of palliative care Joining Oxford Medicine Online this resource offers the best quality content in an easy to access format Online only benefits include downloading images and figures to PowerPoint and downloading chapters to PDF *Handbook of Pain and Palliative Care* Rhonda J. Moore,2013-10-25 Handbook of Pain and Palliative Care Biobehavioral Approaches for the Life Course Rhonda J Moore editor This book takes both a biobehavioral and a lifespan approach to understanding long term and chronic pain and intervening to optimize patients functioning Rich in clinical diversity chapters explore emerging areas of interest computer based interventions fibromyalgia stress ongoing concerns cancer pain low back pain and special populations pediatric elderly military This coverage provides readers with a knowledge base in assessment treatment and management that is up to date practice strengthening and forward looking Subject areas featured in the Handbook include

Patient practitioner communication Assessment tools and strategies Common pain conditions across the lifespan Biobehavioral mechanisms of chronic pain Pharmaceutical neurological and rehabilitative interventions Psychosocial complementary alternative narrative and spiritual approaches Ethical issue and future directions With the rise of integrative perspective and the emphasis on overall quality of life rather than discrete symptoms pain management is gaining importance across medical disciplines Handbook of Pain and Palliative Care stands out as a one stop reference for a range of professionals including health practitioners specializing in pain management or palliative care clinical and health psychologists public health professionals and clinicians and administrators in long term care and hospice

**Culture and Cancer Care** Simon Dein, 2006 Cancer is more than a biological disease Cultural factors are involved at every stage in the journey through cancer from prevention to palliative care Based upon recent studies from the United Kingdom Europe and the United States Culture and Cancer Care examines a number of cultural themes in relation to cancer including The disparity of rates of cancer among different ethnic groups Culture and screening Breaking bad news and communication Cultural variations in emotional responses to cancer Cultural variability in cancer treatments and the influence on prognosis Palliative care across cultures The book focuses on three main themes culture race and ethnicity and their relationship to cancer the cultural context of sickness and help seeking behaviour the shift from biomedicine to alternative forms of treatment Throughout the book a critical stance is adopted towards race and culture focusing on the relation between these concepts and social deprivation Culture and Cancer Care is key reading for students researchers and practitioners in oncology and palliative care offering a clear analysis of cultural differences with regard to illness and health care as well as suggestions of how ethnic disparities can be overcome both at a political and local level through cultural understanding and culturally appropriate health education

**Ethics for Health Care** Catherine Anne Berglund, 1998 Ethics for Health Care considers ethics in the context of routine health care It follows a sequence that is familiar in health care education and practice training adopting a profession becoming a team member in a health care setting beginning to see clients and working with clients as their treatment progresses While the theory of health care ethics is a central feature of the discussion the book moves beyond the traditional theory oriented organisation of most ethics texts to a structure that is generated by practical professional and client needs Focusing on the interaction between health care provider and client it draws on practical experience and contemporary issues in its exploration of the ethical choices that must be made in health care Readers are encouraged to relate the ideas presented to their own views and experiences and to answer questions as they read Ethical issues are a feature of the everyday work of health professionals This book is designed to equip health care students and health professionals with the skills and knowledge to deal with these concerns

**The Journal of Clinical Ethics**, 2006 *Oncology & hematology* Martin D. Abeloff, 2001 **Cancer and the Family** Lea Baider, Cary L. Cooper, Atara Kaplan De-Nour, 2000-06-15 Since the first edition of this book in 1996 the field has made great strides as

research and clinical studies have shed new light on the important role of the family in cancer The second edition has been completely revised and extended to incorporate this new knowledge With ten more chapters than the first edition new areas are discussed including the role of culture and belief systems specific family intervention and the impact of genetics on the response of patients and their families to cancer BOOK JACKET      *Medical Ethics at the Dawn of the 21st Century* Raphael Cohen-Almagor,2000      Subject Guide to Books in Print ,1991      Cumulative Book Index ,1998 A world list of books in the English language      **The Annals of the American Academy of Political and Social Science** ,1980      **Ethical Issues in Death and Dying** Tom L. Beauchamp,Robert M. Veatch,1996 This anthology of major classical and contemporary views on key ethical aspects of death and dying is the only philosophically sophisticated interdisciplinary and up to date introduction to the subject available Pairs pro and con arguments to give a balanced perspective Covers a range of topics that reflect the latest developments at the frontier of the field Provides clearly and carefully written section introductions that define the issues to be discussed Introduces each selection with a brief editorial essay Features up to date and solid analyses of all issues Offers an excellent introduction to ethical theory      Cancer Research ,1997
