<u>Violence in America: Historical and Comparative Perspectives</u> Hugh Davis Graham, Ted Robert Gurr, 1969 <u>Democracy and Democratization</u> John D Nagle, Alison Mahr, 1999-05-26 This wide ranging overview of the processes of democratization in post Communist Europe places the transitions in East Central Europe within a broad European and global context The

authors begin with a introduction to the concept and theories of democracy and then examine the emerging politics of the new democracies to set the post Communist transitions in longer term comparative perspective with earlier and existing processes of democratization in Southern Europe Latin America and East and Southeast Asia Finally the politics of EU accession are introduced to place the transitions within the wider context of European integration Concluding with a summary of recent critiques of modern democracy and looking toward future theories this text provides a comprehensive introduction to what will remain the key contemporary issue for all students of political science **Poverty and Deprivation in Ireland in Comparative Perspective**, Communist Regimes in Comparative Perspectives, 1991

Post-communist Studies And Political Science Jr. Fleron, Erik P Hoffmann, 2019-08-15 Serious stock taking is in progress now among practitioners of whathas been called Sovietology meaning studies of the Union of SovietSocialist Republics The reason is that the field for the most part hadnot been expecting what happened in 1991 The USSR collapsed andwent out of existence as a unified state system governing a sixth of the world's territory having allowed its East European empire to free itself from Soviet dominance somewhat earlier It might be said in defense of Sovietology that by the beginning of the 1980s it understood that economic and political crises werebrewing in the Soviet Union and its outer empire But the field as a whole failed to grasp the full depth of the systemic crisis in SovietRussia and the destructive or self destructive potentialities inherentin it As the editors of this valuable volume write in the Introduction Sovietology was not Regime Dynamics in EU's Eastern Neighbourhood Sergiu prepared for perestroika and postcommunism Buscaneanu, 2017-01-04 This book examines the effectiveness and consistency of EU democracy promotion in its Eastern neighbourhood between 1991 and 2014 It concludes that the EU s democratization role in this region was not surprisingly weak within this time period However this weak role only took shape under four domestic and transnational conditions a a higher cost benefit balance of rule transfer b a lower structural difficulty a given country would need to overcome on its way towards a democratic regime c increased levels of authority distribution across branches of power and d a higher extent of democratic diffusion resulting from regional interactions In those countries where these domestic and transnational conditions were present as in Moldova Ukraine and Georgia the EU s democratizing influence was in causal terms only the tip of the iceberg Most variation in regime dynamics remains to be explained by domestic and transnational contexts

American Government in Comparative Perspective Charles W. Dunn, Martin W. Slann, 2000 The only American Government text to take a comparative approach Dunn and Slann's text doesn't simply offer comparative material in boxed features but integrates it throughout the text to help students gain a deeper and more complete vision of our government by comparing and contrasting it to the governments of other nations. The new edition helps students learn what makes American government and politics distinctive and encourages them to see why it has endured for over 200 years. By presenting American government within a comprehensive comparative and global framework the book exposes students to global issues.

and helps them to grow in cross cultural understanding while at the same time giving them a solid foundation in American **How Nations Escape Poverty** Rainer Zitelmann, 2024-03-26 A rigorous defense of free markets government and politics and open enterprise in the tradition of Adam Smith During the 20th century Vietnam and Poland were both victims not only of devastating wars but also of socialist planned economies that destroyed whatever war hadn t already In 1990 Vietnam was still one of the poorest countries in the world while Poland was one of the poorest in Europe But in the three decades since then both countries have drastically improved their citizens standards of living and escaped the vicious cycle of national poverty In this book Rainer Zitelmann identifies the reasons behind the sensational growth of both nations economies drawing out the lessons that other countries can learn from these two success stories To explain the source of their success he returns to Adam Smith s 1776 treatise The Wealth of Nations the only way to overcome poverty is through economic growth Smith wrote and economic freedom is the crucial prerequisite for such growth Developments over the past 250 years have proved Smith right The market economy has led to a global decline in poverty unparalleled in human history Compare this to the fifty years of development aid in Africa that have only entrenched the status quo and it is clear which approach yields superior results Despite these strides almost ten percent of the world's population still lives in extreme poverty So what measures actually help to alleviate poverty today Through a wealth of data and stories from the everyday lives of Polish and Vietnamese people who experienced reforms Zitelmann demonstrates the persistent relevance of Smith's ideas to economic flourishing in the 21st century **Theoretical and Comparative Perspectives on Nationalism Taras** Kuzio, 2007 This volume brings together 15 articles divided into four sections on the role of nationalism in transitions to democracy the application of theory to country case studies and the role played by history and myths in the forging of national identities and nationalisms. The book develops new theories and frameworks through engaging with leading scholars of nationalism Hans Kohn's propositions are discussed in relation to the applicability of the term civic with no ethno cultural connotations to liberal democracies Rogers Brubaker over the usefulness of dividing European states into civic and nationalizing states when the former have historically been nationalizers Will Kymlicka on the applicability of multiculturalism to post communist states and Paul Robert Magocsi on the lack of data to support claims of revivals by national minorities in Ukraine The book also engages with transitology over the usefulness of comparative studies of transitions in regions that underwent only political reforms and those that had quadruple transitions implying simultaneous democratic and market reforms as well as state and nation building A comparative study of Serbian and Russian diasporas focuses on why ethnic Serbs and Russians living outside Serbia and Russia reacted differently to the disintegration of Yugoslavia and the USSR The book dissects the writing of Russian and Soviet history that continues to utilize imperial frameworks of history analyzes the re writing of Ukrainian history within post colonial theories and discusses the forging of Ukraine's identity within theories of Others as central to the shaping of identities. The collection of articles proposes a new

framework for the study of Ukrainian nationalism as a broader research phenomenon by placing nationalism in Ukraine within a theoretical and comparative perspective Citizen Support for Democratic and Autocratic Regimes Marlene Mauk, 2020-04-30 Citizen Support for Democratic and Autocratic Regimes takes a political culture perspective on the struggle between democracy and autocracy by examining how these regimes fare in the eyes of their citizens Taking a globally comparative approach it studies both the levels as well as the individual and system level sources of political support in democracies and autocracies worldwide The book develops an explanatory model of regime support which includes both individual and system level determinants and specifies not only the general causal mechanisms and pathways through which these determinants affect regime support but also spells out how these effects might vary between the two types of regimes It empirically tests its propositions using multi level structural equation modeling and a comprehensive dataset that combines recent public opinion data from six cross national survey projects with aggregate data from various sources for more than 100 democracies and autocracies It finds that both the levels and individual level sources of regime support are the same in democracies and autocracies but that the way in which system level context factors affect regime support differs between the two types of regimes The results enhance our understanding of what determines citizen support for fundamentally different regimes help assessing the present and future stability of democracies and autocracies and provide clear policy implications to those interested in strengthening support for democracy and or fostering democratic change in autocracies Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www ecprnet eu The series is edited by Susan Scarrow Chair of the Department of Political Science University of Houston and Jonathan Slapin Professor Department of Political Science University of Zurich
