Communitarian Moment:

The Communitarian Moment Christopher Clark, 2019-06-07 In 1842 a group of radical abolitionists formed a community in Northampton Massachusetts in order to pioneer a better and purer state of society Calling themselves the Northampton Association of Education and Industry they envisioned a world free of poverty and inequality religious intolerance slavery and racial injustice In telling the fascinating and little known history of the Association Christopher Clark offers insights into the communitarian moment of the 1840s which saw the establishment of dozens of utopian communities by Americans determined to challenge the tenets of their society One of the few places in mid nineteenth century America where white and black people could live as equals the Northampton community was home to almost two hundred and fifty men women and children during its four and a half years of existence The membership comprised an unusual collection of individuals among them small manufacturers abolitionist lecturers teachers craftsmen laborers and former slaves including Sojourner Truth Offering biographical sketches of a variety of intriguing characters Clark describes the inhabitants daily routines their struggle to support themselves through the production of silk the roles of men and women and tensions among members of different cultural backgrounds Finally he looks at the reasons for the closing of the community and follows the lives of its members recounting the subsequent softening of their political convictions Throughout his masterful narrative Clark views the Northampton Association in its wider social and cultural context He shows how by attempting to initiate radical change the Association and other utopian groups tested the ideological limits of antebellum society Clark helps us understand both the significance of their vision and what was lost when that vision was abandoned We Will Be Free Nancy

Education Now is a clear and persuasive account of the way in which popular seventeenth and eighteenth century theories about the human condition formed the basis for America's choices in the realms of politics economics and education Theobald chronicles the fate of alternative less popular ideas about the human condition ideas that would have led to vastly different political economic and educational landscapes than those we experience today This book exposes the flaws among prevalent theories and the strength of those alternatives that were dismissed or ignored In so doing Theobald points the way toward substantive changes across three dimensions ubiquitous to human life politics economics and education **The**
