Community In Historical Perspective:

Community in Historical Perspective Otto Friedrich von Gierke, 1990 This is the first English translation of the first work of Otto von Gierke arguably the greatest historian of ideas of the nineteenth century Community in Historical Perspective includes much of the first volume of *Das Deutsche Genossenschaftsrecht* originally published in 1868 and the texts translated here have become essential reading for anyone interested not only in the history of ideas and alternatives to conventional socialism and liberalism but also as recent experience has shown contemporary European affairs Von Gierke's represented an unparalleled attempt to justify a political programme of structural pluralism and to interpret the entire course of European history from the Dark Ages onwards as a progressive interaction between fellowship or comradeship and lordship or sovereignty This interaction was to generate a polity of autonomous associations within a constitutional state based upon consent and federal unity and von Gierke here laid the basis for a distinctively Germanic programme of federalism and quasi pluralism with a strongly nationalist emphasis upon the unique capacity of Germans despite long periods of absolute rule for corporate self management

Perspectives Antony Black, 2024-10-28 Running through the papers collected here is the concern to try and understand the reasons which people thought they had for acting in a certain way and not always the same thing the reasons which they expressed for what they were doing The book's first section focuses on the theories of government in the late medieval Church especially the ideas of conciliarism the second is concerned with the study of medieval guild and city organisation and politics looking at the communal movement and at the impact of Christianity on the development of republican ideas In the papers in the final part Professor Black takes a comparative approach setting the political thought and traditions of the Islamic world in particular alongside those of Western Europe as part of an attempt to understand the origins of the modern state to know why this emerged in Europe he argues it is necessary to ask why it did not develop elsewhere and it is intellectual and cultural factors which provide the most obvious differentiating features
