Commutative Algebra Singularities And Computer Algebra:

   Commutative Algebra, Singularities and Computer Algebra Jürgen Herzog,Victor Vuletescu,2003-10-31 Proceedings of the NATO Advanced Research Workshop held in Sinaia Romania 17 22 September 2002   *Commutative Algebra, Singularities and Computer Algebra* Jürgen Herzog,Victor Vuletescu,2012-12-06 Proceedings of the NATO Advanced Research Workshop held in Sinaia Romania 17 22 September 2002   *Singularities and Computer Algebra* Christoph Lossen,Gerhard Pfister,2006-04-06 A collection of articles giving overviews and open questions in singularities and their computational aspects   *A Singular Introduction to Commutative Algebra* Gert-Martin Greuel,Gerhard Pfister,2007-11-05 This substantially enlarged second edition aims to lead a further stage in the computational revolution in commutative algebra This is the first handbook tutorial to extensively deal with SINGULAR Among the book s most distinctive features is a new completely unified treatment of the global and local theories Another feature of the book is its breadth of coverage of theoretical topics in the portions of commutative algebra closest to algebraic geometry with algorithmic treatments of almost every topic   **Description of SINGULAR: A Computer Algebra System for Singularity Theory, Algebraic Geometry and Commutative Algebra** Gert-Martin Greuel,1999   **Computer Algebra in Scientific Computing** V.G. Ganzha,E.W. Mayr,E.V. Vorozhtsov,2006-11-30 This volume contains revised versions of the papers submitted to the workshop by the participants and accepted by the program committee after a thorough reviewing process The collection of papers included in the proceedings covers not only various expanding applications of computer algebra to scienti c computing but also the computer algebra systems themselves and the CA algorithms The eight earlier CASC conferences CASC 1998 CASC 1999 CASC 2000 CASC 2001 CASC 2002 CASC 2003 CASC 2004 and CASC 2005 were held spectively in St Petersburg Russia in Munich Germany in Samarkand Uzb istan in Konstanz Germany in Crimea Ukraine in Passau Germany in St Petersburg Russia and in Kalamata Greece and they proved to be successful It was E A Grebenikow Computing Center of the Russian Academy of S ences Moscow who drew our attention to the group of mathematicians and c puter scientists at the Academy of Sciences of Moldova conducting research in the eld of computer algebra We were impressed that this group not only is concerned with applications of CA methods to problems of scienti c computing but also c ries out research on the fundamental principles underlying the current computer algebra systems themselves see also their papers in the present proceedings v ume It was therefore decided to organize the 9th workshop on Computer Algebra in Scienti c Computing CASC 2006 in Chi sin au the capital of Moldova   **Singularities and Computer Algebra** Wolfram Decker,Gerhard Pfister,Mathias Schulze,2017-03-29 This book arose from a conference on Singularities and Computer Algebra which was held at the Pfalz Akademie Lambrecht in June 2015 in honor of Gert Martin Greuel s 70th birthday This unique volume presents a collection of recent original research by some of the leading figures in singularity theory on a broad range of topics including topological and algebraic aspects classification problems deformation theory and resolution of singularities

At the same time the articles highlight a variety of techniques ranging from theoretical methods to practical tools from computer algebra Greuel himself made major contributions to the development of both singularity theory and computer algebra With Gerhard Pfister and Hans Sch nemann he developed the computer algebra system SINGULAR which has since become the computational tool of choice for many singularity theorists The book addresses researchers whose work involves singularity theory and computer algebra from the PhD to expert level   A First Course in Computational Algebraic Geometry Wolfram Decker,Gerhard Pfister,2013-02-07 A quick guide to computing in algebraic geometry with many explicit computational examples introducing the computer algebra system Singular   *Introduction to Singularities and Deformations* Gert-Martin Greuel,Christoph Lossen,Eugenii Shustin,2025 In the second edition we do not only correct errors update references and improve some of the proofs of the text of the first edition but also add a new chapter on singularities in arbitrary characteristic We give an overview of several aspects of singularities of algebraic varieties and formal power series defined over a field of arbitrary characteristic algebraically closed or not Almost all of the results presented here appeared after the publication of the first edition and some results are new In particular we treat in arbitrary characteristic the classical invariants of hypersurface singularities and we review results on the equisingularity of plane curve singularities on the classification of parametrizations of plane branches and on hypersurface and complete intersection singularities with small moduli Moreover we discuss and prove determinacy and semicontinuity results of families of ideals and matrices of power series parametrized by an arbitrary Noether base scheme which are used to prove open loci properties for several singularity invariants The semicontinuity has surprising applications in the computation of local standard bases of zero dimensional ideals which are by magnitudes faster than previously known methods The chapter contains two appendices One is by Dmitry Kerner on large submodules within group orbits which relates to determinacy criteria for singularities in very general contexts It is focused on methods applicable to a broad class of fields of arbitrary characteristic while before the theory was mainly restricted to zero characteristic The second appendix is by Ilya Tyomkin and deals with the geometry of Severi varieties mainly on toric varieties It discusses the breakthrough solution to the problem on the irreducibility of Severi varieties of the plane in arbitrary characteristic with a focus on the characteristic free approach based on tropical geometry We try to be self contained and give proofs whenever possible However due to the amount of material this is not always possible and we then give precise references to the original sources   **Computer Algebra in Scientific Computing** François Boulier,Matthew England,Timur M. Sadykov,Evgenii V. Vorozhtsov,2020-10-17 This book constitutes the refereed proceedings of the 22nd International Workshop on Computer Algebra in Scientific Computing CASC 2020 held in Linz Austria in September 2020 The conference was held virtually due to the COVID 19 pandemic The 34 full papers presented together with 2 invited talks were carefully reviewed and selected from 41 submissions They deal with cutting edge research in all major disciplines of computer algebra The papers cover topics such as polynomial algebra symbolic and symbolic

Determinants, Gröbner Bases and Cohomology Winfried Bruns,Aldo Conca,Claudiu Raicu,Matteo Varbaro,2022-12-02 This book offers an up to date comprehensive account of determinantal rings and varieties presenting a multitude of methods used in their study with tools from combinatorics algebra representation theory and geometry After a concise introduction to Gr bner and Sagbi bases determinantal ideals are studied via the standard monomial theory and the straightening law This opens the door for representation theoretic methods such as the Robinson Schensted Knuth correspondence which provide a description of the Gr bner bases of determinantal ideals yielding homological and enumerative theorems on determinantal rings Sagbi bases then lead to the introduction of toric methods In positive characteristic the Frobenius functor is used to study properties of singularities such as F regularity and F rationality Castelnuovo Mumford regularity an important complexity measure in commutative algebra and algebraic geometry is introduced in the general setting of a Noetherian base ring and then applied to powers and products of ideals The remainder of the book focuses on algebraic geometry where general vanishing results for the cohomology of line bundles on flag varieties are presented and used to obtain asymptotic values of the regularity of symbolic powers of determinantal ideals In characteristic zero the Borel Weil Bott theorem provides sharper results for GL invariant ideals The book concludes with a computation of cohomology with support in determinantal ideals and a survey of their free resolutions Determinants Gr bner Bases and Cohomology provides a unique reference for the theory of determinantal ideals and varieties as well as an introduction to the beautiful mathematics developed in their study Accessible to graduate students with basic grounding in commutative algebra and algebraic geometry it can be used alongside general texts to illustrate the theory with a particularly interesting and important class of varieties **Computational Commutative and Non-commutative Algebraic Geometry** Svetlana Cojocaru,Gerhard Pfister,Victor Ufnarovski,2005 Mathematical Reviews ,2007
