The Jacobson Radical of Classical Rings

Gregory Karpilovsky, 1991 This book aims to provide comprehensive coverage of the structure of the Jacobson radical of classical rings Special attention is drawn to the discoveries concerning the Jacobson radical of graded rings The main objective has been to present an accessible self contained and detailed coverage of the present state of the subject so that the reader can find in one place all that is needed for a thorough understanding of the main results along with concrete information on how the ideas are applied

A Description of the Jacobson Radical of Semigroup Rings of

Commutative Semigroups E. Jespers, P. Wauters, 1986 **Unit Groups of Classical Rings** Gregory Karpilovsky, 1988 The purpose of this book is to give a self contained up to date account of the structure of unit groups of classical rings In so doing the work draws together four areas of mathematics ring theory group theory group representation theory and algebraic number theory The ensuing interplay between these disciplines provides a unique source of enrichment for each of them The main theme centers on two related problems to determine the isomorphism class of the unit group $U(R)$ of ring R in terms of natural invariants associated with R and to find an effective method for the construction of units of ring R Various threads of the development are tied together to convey a comprehensive picture of the current state of the subject Examples are provided to help research workers who need to compute explicitly unit groups of certain rings A familiarity with basic ring theoretic and group theoretic concepts is assumed but a chapter on algebraic preliminaries is included The text is distinguished by its very clear exposition
