**Artificial Intelligence for Education** Mario Allegra, Manuel Gentile, Giuseppe Città, Frank Dignum, Iza Marfisi-Schottman, 2023-11-27  
 What learning teaching and education will be in the next future is an open question  
 Nevertheless believing that an increasing prevalence of AI may not influence the education field seems objectively unlikely  
 In recent years the new renaissance of AI has stimulated discussion on how advances in AI can influence the educational sector and the future educational policies and the impact of AI on Technology Enhanced Learning TEL  
 On the other side the attention of the education sector in artificial intelligence is complemented by the consideration that since the early days of AI researchers have shown for the education sector which has often seen education as one of the preferred application areas  
 The interaction between the AI and TEL research fields led to the investigation of how the advance in AI could support the development of flexible inclusive personalized engaging and effective learning tools  
 Besides research in this area could be a powerful tool to open the learning black box by providing a deeper understanding of how learning occurs  
 The proposed Research Topic aims to gather contributions that provide a comprehensive picture of how AI is changing educational practices and how the key stakeholders in the educational community i.e. students teachers faculty and families perceive this ongoing change  
 Relevant topics include but are not limited to AI applications in real world educational settings
