Robots, Artificial Intelligence and Service Automation in Travel, Tourism and Hospitality Stanislav Ivanov, Craig Webster, 2019-10-14 Using a combination of theoretical discussion and real world case studies this book focuses on current and future use of RAISA technologies in the tourism economy including examples from the hotel restaurant travel agency museum and events industries **Artificial Intelligence for Customer Relationship Management** Boris

Galitsky, 2020-12-23 The second volume of this research monograph describes a number of applications of Artificial Intelligence in the field of Customer Relationship Management with the focus of solving customer problems We design a system that tries to understand the customer complaint his mood and what can be done to resolve an issue with the product or service To solve a customer problem efficiently we maintain a dialogue with the customer so that the problem can be clarified and multiple ways to fix it can be sought We introduce dialogue management based on discourse analysis a systematic linguistic way to handle the thought process of the author of the content to be delivered We analyze user sentiments and personal traits to tailor dialogue management to individual customers We also design a number of dialogue scenarios for CRM with replies following certain patterns and propose virtual and social dialogues for various modalities of communication with a customer After we learn to detect fake content deception and hypocrisy we examine the domain of customer complaints We simulate mental states attitudes and emotions of a complainant and try to predict his behavior Having suggested graph based formal representations of complaint scenarios we machine learn them to identify the best action the customer support organization can chose to retain the complainant as a customer Conversational Artificial

Intelligence Romil Rawat, Rajesh Kumar Chakrawarti, Sanjaya Kumar Sarangi, Anand Rajavat, Mary Sowjanya Alamanda, Kotagiri Srividya, K. Sakthidasan Sankaran, 2024-03-06 This book reviews present state of the art research related to the security of cloud computing including developments in conversational AI applications It is particularly suited for those that bridge the academic world and industry allowing readers to understand the security concerns in advanced security solutions for conversational AI in the cloud platform domain by reviewing present and evolving security solutions their limitations and future research directions Conversational AI combines natural language processing NLP with traditional software like chatbots voice assistants or an interactive voice recognition system to help customers through either a spoken or typed interface Conversational chatbots that respond to questions promptly and accurately to help customers are a fascinating development since they make the customer service industry somewhat self sufficient A well automated chatbot can decimate staffing needs but creating one is a time consuming process Voice recognition technologies are becoming more critical as AI assistants like Alexa become more popular Chatbots in the corporate world have advanced technical connections with clients thanks to improvements in artificial intelligence However these chatbots increased access to sensitive information has raised serious security concerns Threats are one time events such as malware and DDOS

Distributed Denial of Service assaults Targeted strikes on companies are familiar and frequently lock workers out User privacy violations are becoming more common emphasizing the dangers of employing chatbots Vulnerabilities are systemic problems that enable thieves to break in Vulnerabilities allow threats to enter the system hence they are inextricably linked Malicious chatbots are widely used to spam and advertise in chat rooms by imitating human behavior and discussions or to trick individuals into disclosing personal information like bank account details *Good Data* Angela Daly, Monique Mann, S. Kate Devitt, 2019-01-23 Moving away from the strong body of critique of pervasive bad data practices by both governments and private actors in the globalized digital economy this book aims to paint an alternative more optimistic but still pragmatic picture of the datafied future The authors examine and propose good data practices values and principles from an interdisciplinary international perspective From ideas of data sovereignty and justice to manifestos for change and calls for activism this collection opens a multifaceted conversation on the kinds of futures we want to see and presents concrete steps on how we can start realizing good data in practice
