

CONTINUOUS QUALITY IMPROVEMENT TECHNIQUES

Continuous quality improvement is based on the idea that some of the most effective and impactful things are achieved through simple means.

Mind Mapping

A mind map is a diagram that helps to visually organize information. A technique often used to connect related ideas and pieces of information. Useful when brainstorming.

Standard work
Documenting the current best practice for a given task or process, including necessary diagrams and images to support it.

Catchball
Borrowed from Lean business management methodology. The idea that regardless of who starts a project, they must state the purpose, objectives, and other ideas and then "throws" them to others for feedback and support.

5 Whys

A process to get to the root of a problem. If something goes wrong, you ask "why" to find an answer, then you ask "why" again until you have asked five times. This can help you break down even the most complex processes.

Digital Huddle Boards

Also known as Kaizen boards, these are used to create a visual representation of improvement work.

5S

A workplace organization methodology that uses five Japanese words; seiri (sort), seiton (set), seiso (shine), seiketsu (standardize), and shitsuke (sustain).

Gemba Walks

Refers to a supervisor or leader walking through the place where work is done to observe processes, ask questions, and find practical opportunities for improvement.

Value Stream Mapping

Documenting and assessing everything that happens to bring value to customers. An end-to-end analysis of a customer's journey with your service or products.

PDSA (Plan, Do Study, Act)

A basic improvement cycle that helps teams act on opportunities for improvement.
