Technical Communication and the World Wide Web Carol Lipson, Michael Day, 2005-05-06 Technical Communication and the World Wide Web is a collective of sixteen chapters designed to help technical communication teachers prepare their students for twenty first century writing for the World Wide Web by providing advice and examples in **Writing and Speaking in the Technology Professions** David F. Beer, 2003-07-04 An updated edition of the classic guide to technical communication Consider that 20 to 50 percent of a technology professional's time is spent communicating with others Whether writing a memo preparing a set of procedures or making an oral presentation effective communication is vital to your professional success This anthology delivers concrete advice from the foremost experts on how to communicate more effectively in the workplace The revised and expanded second edition of this popular book completely updates the original providing authoritative guidance on communicating via modern technology in the contemporary work environment Two new sections on global communication and the Internet address communicating effectively in the context of increased e mail and web usage As in the original David Beer's Second Edition discusses a variety of approaches such as Writing technical documents that are clear and effective Giving oral presentations more confidently Using graphics and other visual aids judiciously Holding productive meetings Becoming an effective listener The new edition also includes updated articles on working with others to get results and on giving directions that work Each article is aimed specifically at the needs of engineers and others in the technology professions and is written by a practicing engineer or a technical communicator Technical engineers IEEE society members and technical writing teachers will find this updated edition of David Beer's classic Writing and Speaking in the Technology Professions an invaluable guide to successful communication The Cultural Context in Business Communication Susanne Niemeier, Charles P. Campbell, René Dirven, 1998 The Cultural Context in Business Communication focuses on differences and similarities in business negotiations and written communication in intercultural settings To set the scene Edward T Hall looks back at culture as an evolutionary concept and Charles Campbell explains the value of classical rhetoric in contemporary cultures Further contributions present case studies of cross cultural encounters and discourse aspects in various settings Steven Weiss explores the proper character of six cultures Chinese French Japanese Mexican Nigerian and Saudi Other chapters contrast English with cultures such as Chinese German Dutch Finnish and Irish The book closes with two chapters on training for effective business communication and provide models in participatory training and gaming Translation and Localization Bruce Maylath, Kirk St. Amant, 2019-05-16 Detailed yet

accessible Translation and Localization brings together the research and insights of veteran practicing translators to offer comprehensive guidance for technical communicators The volume begins with the fundamentals of translation before leading readers through the process of preparing technical documents for translation It then presents the broader area of localization again beginning with its key competencies Concluding chapters examine the state of the field as computers take on more translation and localization work Featuring real life scenarios and a broad range of experienced voices this is an invaluable resource for technical and professional communicators looking to expand into international markets

Connecting People with Technology George Hayhoe, Helen M. Grady, 2020-11-25 This book explores five important areas where technology affects society and suggests ways in which human communication can facilitate the use of that technology Usability has become a foundational discipline in technical and professional communication that grows out of our rhetorical roots which emphasize purpose and audience As our appreciation of audience has grown beyond engineers and scientists to lay users of technology our appreciation of the diversity of those audiences in terms of age geography and other factors has similarly expanded We are also coming to grips with what Thomas Friedman calls the flat world a paradigm that influences how we communicate with members of other cultures and speakers of other languages And because most of the flatteners are either technologies themselves or technology driven technical and professional communicators need to leverage these technologies to serve global audiences Similarly we are inundated with information about world crises involving health and safety issues These crises are driven by the effects of terrorism the aging population HIV AIDS and both human made and natural disasters These issues are becoming more visible because they are literally matters of life and death Furthermore they are of special concern to audiences that technical and professional communicators have little experience targeting the shapers of public policy seniors adolescents and those affected by disaster Biotechnology is another area that has provided new roles for technical and professional communicators We are only beginning to understand how to communicate the science accurately without either deceiving or panicking our audience We need to develop a more sophisticated understanding of how communication can shape reactions to biotechnology developments Confronting this complex network of issues we are challenged to fashion both our message and the audience's perceptions ethically Finally today's corporate environment is being shaped by technology and the global nature of business Technical and professional communicators can play a role in capturing and managing knowledge in using technology effectively in the virtual workplace and in understanding how language shapes organizational culture
