Communication And Community Implications Of Martin Bubers Dialogue:

Communication and Community Ronald C. Arnett, 1986 Martin Buber's work suggests that real life begins with two individuals engaged in dialogue not just taking care of one's own needs as described in social Darwinism Arnett argues that the end of the age of abundance demands that we give up the communicative strategies of the past and seek to work together in the midst of limited resources and an uncertain future Today's situation calls for an unwavering commitment to Buber's narrow ridge concern for both self and community Arnett illustrates the narrow ridge definition of interpersonal communication with rich examples His vignettes demonstrate effective and ineffective approaches to human community An effective approach he makes clear incorporates not only openness to others points of view but also a willingness to be persuaded

Martin Buber and the Human Sciences Maurice Friedman, 2012-02-01 The specific focus of Martin Buber and the Human Sciences is dialogue as the foundation of and integrating factor in the human sciences using dialogue in the special sense which Buber has made famous mutuality presentness openness meeting the other in his or her uniqueness and not just as a content for one's own thought categories and knowing as deriving in the first instance from mutual contact rather than knowledge of a subject about an object By the human sciences the authors editors mean material that can be meaningfully approached in a dialogic way hence the humanities education psychology speech communication anthropology history sociology and economics The essays in Martin Buber and the Human Sciences demonstrate that thirty years after Buber's death his influence is still resonating in many countries and in many fields

The Communicative Relationship Between Dialogue and Care Marie Baker-Ohler, Annette Holba, 2009 This book provides insight into the nature of the relationship between dialogue and care The work is textured and mindful of the human need for authentic communication between embedded human communicative agents This is because the authors are well versed in the field having published articles books and book chapters dealing with the cultivation of human communication and human relationships through aspects of care dialogue and other philosophical preconditions This study approaches the relationship of care and dialogue through a constructive hermeneutic approach situated within the current historical moment while relying on a rich and textured historical tradition of philosophical writings that invite new discussion on the value of this relationship In a historical era of rapidly changing technologies it is often easier to text twitter and e mail in a hypertext mode that fails to acknowledge the dialogic potential in human relationships This book reminds us that even in these technologically sophisticated times we gain more in human relationships through care and dialogue than in quick instant communication It is unique from other books dealing with the relationship between dialogue and care in human relationships because it integrates literature involving communication ethics and philosophies of communication framed around the metaphor of care to provide a more textured insight related to human communication The discussion is an alternative to a social scientific approach Readers will gain a thorough and comprehensive understanding of the issues involved from different perspectives

Many other books on these matters are also theoretically laden with deep philosophical concepts but they are often devoid of connections to everyday experiences which limits application of the ideas. The authors address this by a text that explores those philosophical and theoretically laden concepts related to care in an applied manner so that the practice of these ideas is situated within actual human interaction. This study provides an in depth exploration specifically dealing with care as a philosophical and ethical paradigm for living in the world. This book is distinctive as it encompasses theorists scholars from multiple perspectives that include sociological psychological philosophical and from both social science and humanities approaches all of which come together within a communication framework. The purpose of this book is to provide readers with the opportunity to consider multiple ways of enhancing human communication through discovering how the notion of care has the ability to shape and guide communicative exchanges. Care is posited as a philosophy of communication and more specifically as a communicative ethic that can be embraced in interpersonal and organizational communicative contexts. Our goal is to provide a textured understanding of care as it relates to human communication and as it is foregrounded in philosophical thought. This text will help develop philosophical understanding of this topic that is inescapably linked to human communication. This book will interest all in communication sociology psychology and anthropology.

Dialogically Speaking Kenneth Paul Kramer, 2011-01-01. What makes us authentically human? According to Maurice Friedman, world renowned Martin Buber scholar, translator and biographer, it is genuine dialogue. When there is a willingness for dialogue, Friedman says, then one must navigate moment by moment. It is a listening process. Friedman addresses our humanity in ever unique ways through his dialogue with philosophy, literature, religion, and psychotherapy. At least two things make this book new. Friedman presents his wide ranging thought directly in five original essays forming an intertextual compass which is then elaborated upon by colleagues familiar with his work. Second, a special feature of this book is found at the end of each part which invites readers to engage with questions drawn from and pointing toward Friedman's writing. The book's intended audience includes teachers, scholars, and students interested in dialogical approaches to any of the human sciences. In a time when we are in danger of losing our human birthright, Friedman's interdisciplinary insights point us again to the touch of the other.

Organizational Ethics Craig E. Johnson, 2011-10-26. Equipping students so they can act as change agents who encourage ethical transformation in corporations, small businesses, government, social service agencies, religious groups, the military, and other organizations, this text blends theory and practice as it introduces readers to important ethics theories, concepts, and skills, tools drawn from a variety of academic disciplines, and outlines implementation strategies, tactics. Self assessments, case studies, and chapter end exercises foster skill development, discussion, and analysis.
