Kelly Aune, 2021 Winner of the Jake Harwood Outstanding Book Award 2022 What exactly is understanding And how do people create maintain and manipulate states of understanding via communication This book addresses these questions drawing on interdisciplinary scholarship in cognitive science communication psychology and pragmatics Rejecting classic descriptions of communication as sending and receiving messages this book proposes a novel perspective that depicts communication as a process in which interactants construct test and refine mental modes of a joint experience on the basis of the meme states mental representations activated by stimuli in social interactions It explains how this process when successful results in interactants mental models aligning or becoming entrained in other words in creating a state of understanding This framework is grounded in a set of foundational observations about evolved human cognition that highlight people's intrinsic social orientation predisposition toward efficiency and use of predictive interference making These principles are also used to explain how codified systems codes emerge in extended or repeated interactions in which people endeavor to create understanding Integrating and synthesizing research across disciplines this book offers communication scholars and students a theoretical framework that will transform the way they see understanding communication and social connection

Communication Robert Wandberg, 2000-07 Describes ways people communicate why good communication is important setting communication goals communicating about sex drugs and suicide and ways to advocate for others
