

The Future of Research Evaluation

Issues

Singular focus on publications is a risk

Because this diverts research evaluation of other forms of research value, for example:

Social value

Data management

Peer review

Teaching

Isn't there already efforts to reform?

Yes, but they are localized and piecemeal...

... Risking many research communities falling behind and being excluded from global research

Recent developments are changing the research world:

Open science

Use of technology, including AI tools

Social media

Actions

Global

The Declaration on Research Assessment endorses to serve all individuals and institutions

Regional

Latin America's CLACSO- POLIC Declaration of Principles for Research Assessment

EU's CoARA Coalition on Reforming Research Assessment

National

Some countries are building institutional resiliency, targeting specific sectors, tackling perverse incentives and behaviors.

Sectoral

Specific communities of practice, for example:

Research funders

Early career researchers

International development sector

Research management societies

• IARC Responsible Research Assessment

• IARC Working Group on Scientific Excellence

• IARC's Research Quality Plus (RQP+)

• IARC's SCOPUS Institutional

Technological interventions

Selection processes

Peer review

Identifying plagiarism

Challenges

Multiple challenges/questions, for example:

#1

Will the introduction of more qualitative indicators be widely adopted?

#2

How will AI tools for research evaluation impact the current inequality in science systems worldwide?

#3

How will the use of chat bots to increase quantitative outputs impact the publishing industry?

Processing...

#4

Is the weakness of concerted reform efforts globally leading to further fragmentation?

#5

Can reforms ultimately enable a research ecosystem that thrives on high-quality, ethical, inclusive, diverse and impactful research?

Communications In Transition Issues And Debates In Current Research

Scott A. Myers, Carolyn M. Anderson

Communications In Transition Issues And Debates In Current Research:

Communications in Transition Mary S. Mander, 1983

Introduction to Communication G. M. Du

Plooy, 1995-11-30 This publication aims to introduce undergraduate students to the research practices of communication science with the emphasis on fundamental and basic research

The Handbook of Group Communication Theory and

Research Lawrence R. Frey, Dennis Gouran, Marshall Scott Poole, 1999-07-08 The Handbook of Group Communication Theory and Research establishes a central resource for the field documenting and synthesizing the work done in group communication's 50 year history. With contributions from the most experienced and respected scholars in the field, the editors Lawrence R. Frey, Dennis S. Gouran, and Marshall Scott Poole present an overview of group communication study and examine a variety of theoretical positions and methodological practices. The volume is divided into six broad areas of communication scholarship: Foundations of group communication theory and research; Individuals and group communication; Task and relational group communication; Group communication processes; Group communication facilitation; Group communication contexts and applications. The sections serve as a crossroads where various paths pursued in each area meet, summarize, and suggest new maps and roads that need to be followed in the future. Offering a comprehensive history of group communication theory and research and establishing new conceptual perspectives and research agendas for future group communication scholars, this important resource will be an unrivalled tool for scholars, researchers, educators, practitioners, and students alike.

The Fundamentals of Small Group Communication Scott A. Myers, Carolyn M. Anderson, 2008-01-17 From the Publisher

With a focus on the individual group member, *The Fundamentals of Small Group Communication* encourages readers to reflect on how their communication behaviors and practices contribute to their current small group experiences. In this easy-to-read text, authors Scott A. Myers and Carolyn M. Anderson introduce students to the fundamental issues faced by all small groups, such as socialization, development, ethics, and diversity, and the procedures utilized by effective small groups. The book is organized around three overarching themes: characteristics of small group communication and the individual group member; the group task and group member relationships. Each chapter opens with a case study and includes an *Ethically Speaking* box that allows readers to reflect on how ethics is central to the small group communication process. It is intended for undergraduate courses that introduce students to the basic fundamentals of small group communication.

New

Directions in Group Communication Lawrence R. Frey, 2002 *New Directions in Group Communication* takes as its mission the setting of the agenda for the study of group communication in the future. It does so by presenting work that scholars have not previously explored in the current small group communication literature. Part I focuses on new theoretical and conceptual directions, both presenting new views and extending current positions. Part II examines new research methodologies, while Part III looks at antecedent factors affecting group communication. Parts IV and V of the text provide insight into both group communication process and practices. Part VI covers different group communication contexts, including communication
