Personality Type and Its Effects on Communication Comfort Linda Frances Potter Crumley, 1991

Personal Relationships and Social Support Steve Duck, Roxane Cohen Silver, 1990 It is widely acknowledged that the support given by friends intimates and other members of a social network is important to a person's well being Until recently however little attention has been paid to the relational processes and contexts through which social support is mediated Personal Relationships and Social Support represents a major initiative in its focus upon social support as a phenomenon embedded in the everyday transactions and dynamics of people's interpersonal relationships The authors consider such issues as the importance of the day to day talk of social support within interpersonal relationships the

strategies that people use to mobilize support within particular relational contexts and the impact of people's daily life and work patterns on the need for and ability to mobilize support. The effect in turn of competence in support giving on the development and maintenance of interpersonal relationships is examined as are the possible negative consequences of particular kinds of support. Personal Relationships and Social Support brings together for the first time two strands of work on social support and the nature of interpersonal relationships which have tended to develop in isolation from each other. This path breaking book will be essential reading for all those interested in new developments in theory and research in the field of human relationships. *Included in Communication* Judith S. Trent, 2002. A practice oriented volume written by communication faculty for their colleagues and others who care about the retention and success of students of color in the discipline's gateway courses. The authors have amassed a considerable volume of material and have managed to compress a very detailed discussion into a comparatively small space. The material is logically organized and succinctly presented throughout a valuable reference source. A thoroughly researched and tightly written book which contributes significantly to the corpus scholarship in both interpersonal and intercultural communication. It is highly recommended as a reference source for anyone interested in these increasingly important areas of research. Canadian Journal of Communication. The authors have integrated an impressive array of literature. This book is timely and will help give direction to culture and communication research over the next decade. Clearly structured and the material is well organized. The writing is easy to read and the material generally well integrated. Contemporary Sociology. Offers a very useful grounding and integration of work in this area so far. Journal of Cross Cultural Psychology. **Personality and Interpersonal Communication** James C. McCroskey, John A. Daly, 1987-06-01. Should studies of personality be central to communication research? Should the usefulness of the individual differences approach to interpersonal communication be questioned? McCroskey and Daly while not negating the value of situational research stress the importance of communication research which focuses on individual differences particularly personality type differences. This comprehensive and in depth study will show those who tend to overestimate the influence of the situation that the person is also a critical part of the communication equation. British Paperbacks in Print, 1984.
