Communities Of Difference Culture Language Technology:

Communities of Difference P. Trifonas, 2005-05-05 This book will look at the implications of educational practices in communities that are differentiated by issues of language culture and technology Trifonas argues that a community is at once a gathering of like minded individuals in solidarity of purpose and conviction and also a gathering that excludes others The chapters in this collection will reveal this tension between theory and practice in order to engage the models of community and the theories of difference that support them as a way to teach to learn and to know *Location-Based Gaming* Dale Leorke, 2018-06-29 Location based games emerged in the early 2000s following the commercialisation of GPS and artistic experimentation with locative media technologies Location based games are played in everyday public spaces using GPS and networked mobile technologies to track their players location This book traces the evolution of location based gaming from its emergence as a marginal practice to its recent popularisation through smartphone apps like Pok mon Go and its incorporation into smart city strategies Drawing on this history and an analysis of the scholarly and mainstream literature on location based games Leorke unpacks the key claims made about them These claims position location based games as alternately enriching or diminishing their players engagement with the people and places they encounter through the game Through rich case studies and interviews with location based game designers and players Leorke tests out and challenges these celebratory and pessimistic discourses He argues for a more grounded approach to researching location based games and their impact on public space that reflects the ideologies lived experiences and institutional imperatives that circulate around their design and performance By situating location based games within broader debates about the role of play and digitisation in public life *Location Based Gaming* offers an original and timely account of location based gaming and its growing prominence *Gaming in Social, Locative and Mobile Media* L. Hjorth, I. Richardson, 2014-05-29 Drawing on case studies across the Asia Pacific region *Gaming in Social Locative and Mobile Media* explores the playful turn in contemporary everyday life and the role of mobile devices games and social media in this transformation *Mobile Interfaces in Public Spaces* Adriana de Souza e Silva, Jordan Frith, 2012-04-23 Mobile phones are no longer what they used to be Not only can users connect to the Internet anywhere and anytime they can also use their devices to map their precise geographic coordinates and access location specific information like restaurant reviews historical information and locations of other people nearby The proliferation of location aware mobile technologies calls for a new understanding of how we define public spaces how we deal with locational privacy and how networks of power are developed today In *Mobile Interfaces in Public Spaces* Adriana de Souza E Silva and Jordan Frith examine these social and spatial changes by framing the development of location aware technology within the context of other mobile and portable technologies such as the book the Walkman the iPod and the mobile phone These technologies work as interfaces to public spaces that is as symbolic systems that not only filter information but also reshape communication relationships and the environment in which social interaction takes place

Yet rather than detaching people from their surroundings the authors suggest that location aware technologies may ultimately strengthen our connections to locations

Art in the Asia-Pacific Larissa Hjorth, Natalie King, Mami Kataoka, 2014-02-18 As social locative and mobile media render the intimate public and the public intimate this volume interrogates how this phenomenon impacts art practice and politics Contributors bring together the worlds of art and media culture to rethink their intersections in light of participatory social media By focusing upon the Asia Pacific region they seek to examine how regionalism and locality affect global circuits of culture The book also offers a set of theoretical frameworks and methodological paradigms for thinking about contemporary art practice more generally

Critiquing Generative AI in Africa's Media Ecosystems Lungile A. Tshuma, Trust Matsilele, 2025-11-17 This book takes a critical approach to the rise of Artificial Intelligence AI within the media and communication landscape The book argues that as technology is a social construct reflecting existing power dynamics those in the Global South and in Africa in particular are bound to be marginalised and have their knowledge systems overlooked as the Global North dominates technological developments The birth of AI has ignited debates about its benefits to lower income countries with some highlighting its potential to advance businesses and grow economies However this book argues that AI tools have been produced to serve Western needs and that instead there is a need for countries in Africa to have home grown solutions defined by local values Drawing on case studies and analysis from across the continent the book seeks to caution challenge and proffer solutions to the use and understanding of Generative AI for media and communication in non western societies At a time when generative AI is threatening to shape the future of media and communication around the world this book is a vital and timely contribution to debates within critical data studies and African media studies
