Schwarzweller, 2016-11-11 Appalachia is a region in trouble Even in the more remote coves and hollows major social and economic changes are disturbing the traditional ways of life The conditions which have made it a pocket of poverty cannot be easily eradicated and the rapid changes of recent years have added further severe problems of adjustment which deeply affect the family church life education the folk sub culture and above all the individual Out migration psychological dislocation and cultural alienation are the result The nine contributing scholars have lived and worked in Appalachia they know the people and their customs their problems and their needs They are thoroughly familiar with the programs now in operation and are well qualified to evaluate their success or failure in terms of those needs Furthermore their findings can be applied to other regions and nations wherever an isolated group has been abruptly incorporated into the mainstream of society while many of its peculiar problems remain unsolved Rural Appalachia may in fact be considered a microcosm of the underdeveloped nations of the world the issues raised here far transcend the importance of a regional study The essays are grouped according to four general areas of research The first part deals with the individual in his society the second with six social institutions economy government family religion education and power structure the third with methods and objectives of change and the fourth with the aims of change agencies particularly the Extension Service of the future As the tangle of problems strains and tensions is explored the focus remains steadily upon immediate and long term effects on the individual The book is dedicated to the professional field workers in programs of directed change struggling on the one hand with ideas theories and conceptual innovations and on the other hand with the immediate realities of the local situations      *Community*
