Community Around The World:

Corporate Social Responsibility, Public Relations and Community Engagement Marianne Sison, Zeny Sarabia-Panol, 2018-09-03 Diverse in economic development political and mass media systems the countries in Southeast Asia cast a unique light on the parallels between development cum participative communication and corporate social responsibility In our globalized environments knowledge of power culture and the colonial histories that influence and shape business and governance practices are increasingly important Focusing on six countries Indonesia Malaysia the Philippines Singapore Thailand and Vietnam the book discusses how public relations PR and corporate social responsibility CSR discourse are constructed interpreted communicated and enacted in this diverse emerging region By connecting the disparate disciplines of participatory and development communication with PR and CSR discourse this innovative text explores the tensions between concepts of modernity and traditional values and their role in engendering creativity compliance or resistance This book will be of interest to researchers educators and advanced students in the fields of public relations communication corporate social responsibility corporate communications and Southeast Asia studies

Community Civics Grace Alice Turkington, 1924 **Community** Gerard Delanty, 2018-03-29 The increasing atomization of modern society has been accompanied by an enduring nostalgia for the idea of community as a source of security and belonging in an increasingly insecure world Far from disappearing community has been revived by transnationalism and by new kinds of individualism Gerard Delanty begins this stimulating critical introduction to the concept with an analysis of the origins of the idea of community in Western utopian thought and as a theme in classical sociology and anthropology He goes on to chart the resurgence of the idea within communitarian thought and postmodern philosophies the complications and critiques of multiculturalism and new manifestations of community within a society where changing modes of communication produce both fragmentation and possibilities of new social bonds Contemporary community he argues is essentially a communication community based on belonging and sharing and can be a powerful voice of political opposition The communities of today are less spatially bounded than those of the past but they cannot dispense with the need for a sense of belonging The communicative ties and cultural structures of contemporary societies have opened up numerous possibilities for belonging based on religion nationalism ethnicity lifestyle and gender Christianizing Community Life Harry Frederick Ward, Richard Henry Edwards, 1917 **Japan in the Global Community** Yasusuke Murakami, Yutaka Kōsai, 1986 Community Pulpit , 1897 Contains text of Community Church sermons and addresses

Knowledge that Counts in a Global Community Léonie J. Rennie, Grady Venville, John Wallace, 2013-03-01 As the third millennium progresses we are faced with increasing pressures relating to climate change and the sustainability of life on Earth Concerned citizens are realizing that the responsibility to respond is both local and global There is an increasing sense of urgency about the need to reform the processes of schooling and curriculum to better prepare students for global

citizenship Educators policy makers and the wider community are seeking information about how to proceed with this reform effort particularly how alternative and integrated approaches to curriculum can be used to engage students with the important issues of our time Knowledge that Counts in a Global Community explores the potential contribution of curriculum integration in a context where school curricula are typically segregated by discipline It offers curriculum integration as a powerful tool for educating young citizens so that they can understand and respond to global concerns It argues for an informed citizenry who can think broadly across disciplines and contribute sensibly and pragmatically to local problems with an eye on how this translates to making a global difference In its examination of the twin themes of global knowledge and curriculum integration the book explores the nature of curriculum integration the nature of knowledge the nature of learning The authors reflect on these issues from perspectives gained by more than a decade of research in the area Their in depth scholarly exploration and critical analysis of current approaches to curriculum introduces educators and academics to contemporary ways of conceptualizing the complexities of and relationships among curriculum integration knowledge and learning Throughout the book the authors emphasize the central curriculum question what kinds of outcomes do we want for students of the twenty first century This book will provide a valuable resource for academic educators researchers teachers and others interested in educational policy reform
