Community Engagement and the COVID-19 Pandemic Tawnya Azar,2025-06-24 Community engaged CE teaching is not a new concept However in the past several years it has gained increased emphasis as is evident by the changes to institution mission statements and the allocation of institution resources to support faculty development in CE teaching as well as to support CE coursework and research The arrival of the COVID 19 pandemic forced many faculty members to pivot to an all online instruction model impacting community engaged teaching and research in both predictable and unexpected ways Community partners facing similar struggles to serve their communities with restrictions on face to face interaction were often too overwhelmed to work with higher education volunteers Legally universities could not ask students to risk their health with face to face community engagement In fact the number of CE courses decreased dramatically in 2020 and 2021 due to the unique challenges posed by the pandemic At the same time the pandemic presented some CE faculty with new opportunities for community engagement Some responded swiftly to the immediate needs of the local regional or national community with which they worked taking advantage of the affordances of digital technology or capitalizing on the issues that the pandemic itself created or exacerbated This collection captures the incredible work of pivoting and innovating in community engaged teaching With a primary focus on community engaged teaching in higher education this collection explores how faculty students and community partners navigated their work during the COVID 19 pandemic Additionally it raises important questions about how we might stay engaged with community during a crisis

Place-Based Community Engagement in Higher Education Erica K. Yamamura,Kent Koth,2023-07-03 While an increasing number of universities have or are committed to engaging their campuses in their surrounding communities many recognize they lack the strategic focus and resources to maximize and sustain their impact on those communities Place based community engagement provides a powerful way to creatively connect campus and community to foster positive social transformation In developing community engagement strategies most universities and community organizations face significant challenges in deciding who to partner with and why Frequently this leads universities and community organizations to say yes to too many opportunities which significantly limit their ability to pursue long term impact Focusing on an established geographic area can make it much easier to decide where to deploy resources and which partnerships to prioritize and thus increase their ability to form strong and sustainable partnerships that are of greater value to all stakeholders This book presents the emerging model of place based community engagement as a powerful process for attaining more positive and enduring results in their local communities as well as stimulating wider engagement by campus constituencies Drawing upon the concept of collective impact and using data driven decision making place based initiatives build long term partnerships based upon a shared vision Done thoughtfully these place based initiatives have attained

impressive results Drawing upon the case studies of five institutions that have implemented place based community engagement initiatives the authors provide guidance on the opportunities challenges and considerations involved in putting a place based approach into effect By sharing the experiences of these five institutions they describe in detail the routes each took to turn their place based initiatives from concept to reality and the results they achieved

Allen,Roni Reiter-Palmon,2019-01-03 This is an ideal reference for those looking to understand study and practice community engagement and outreach It discusses the different ways individuals including faculty administrators and management in organizations engage in their communities It supplies case studies best practices and theoretical approaches to the study of community engagement Scholars active in this field can use this book as an integration of the current knowledge concerning community engagement and as an inspiration for future research agendas Whilst directing how to implement effective community engagement practices the book also facilitates the application of organizational theory to community engagement It will appeal to academics who are interested in the theoretical background of community engagement

Inequities in Higher Education Yolanda Flores-Niemann,Geoffrey Maruyama,Irene Hanson Frieze,2005-09-12 This volume provides a forum to discuss the ways to increase and strategies to manage diversity within the legal and political boundaries of the United States in the absence of Affirmative Action Reflects upon the positive affect that diversity in higher education has on the students faculty and community involved Discusses the future of affirmative action in the light of the Supreme Court's 2003 decision in *Grutter v Bollinger*

Community Matters: Service-Learning in Engaged Design and Planning Mallika Bose,Paula Horrigan,Cheryl Doble,Sigmund C. Shipp,2014-05-09 Winner of the EDRA 2015 Book Award **Community Matters Service Learning in Engaged Design and Planning** explores issues that resonate with a diverse group of design and planning educators drawn to the challenge of supporting greater community building and empowerment while combining learning with practice The book explores such questions as How do we foster mutuality and reciprocity in community academy partnerships What conflicts challenges limits and obstacles do we face in our service learning studios and projects What evidence do we have of our impacts on students and communities and how are we responding How are we being attentive to the contemporary environmental and societal issues What is our role as both designers and agents of societal change How are we innovating to enable greater capacities for individuals future practitioners and communities This book provides compelling evidence that educators should be adopting engaged pedagogies research methods and theories through which they can bring together education practice and scholarship at the boundary of community and academy

Community Involvement in Urban Health Programmes Golda C. Chimere-Dan, 1996 The South African government places strong emphasis on community involvement as one of the main routes to the provision of effective primary health care services to the people In this book the author examines the relevant issues stressing the need to take grass roots community perspectives into account to ensure the success of any endeavour to involve the community in health care programmes The discussion is contextualised by placing it against the background of South African case studies
