Handbook of Research on Gaming Trends in P-12 Education Russell, Donna, Laffey, James M., 2015-10-21 Gaming applications are rapidly expanding into the realm of education. Game based education creates an active and enjoyable learning environment especially for children and young adults who regularly use gaming for recreational purposes. Due to the evolving nature of education, gaming provides a transformative learning experience for diverse students. The Handbook of Research on Gaming Trends in P-12 Education provides current research intended to aid educators, school administrators, and game developers in teaching today's youth in a technology-immersive society. This publication melds together gaming for entertainment purposes as well as gaming applied within educational settings with an emphasis on P-12 classrooms. Featuring exhaustive coverage on topics relating to virtual reality, game design, immersive learning, distance learning through 3D environments, as well as best practices for gaming implementation in real-world settings, this handbook of research is an essential addition to the reference collection of international academic libraries.

**Teaching Poetry in a Digital World** Stefani Boutelier, Sarah J. Donovan, 2025-04-30 Teaching Poetry in a Digital World supports English language arts (ELA) educators for grades 6-12 to incorporate digital literacy in their classrooms by teaching the reading and writing of poetry. In an increasingly digital age, educators must adapt to meet the changing needs and interests of their students by incorporating technology into the classroom. This book introduces its audience to the ePoetry Framework. This framework demonstrates how poetry might present itself in a literacy-based unit with the benefit of a technology medium to share with the world. Examples include teaching the ode, poetry incorporating haiku with the creation of GIFs, and ethically discussing AI with nonet poems. With adaptable lesson plans and assessments, as well as educator examples, the book will inspire teachers to create intentional student-centered ePoetry units. The book is aligned with ELA literacy standards, International Society for Technology in Education (ISTE) educator standards, and National Council of Teachers of English (NCTE)'s position statement for integrating technology into ELA classrooms. It is a key resource for secondary school educators teaching ELA creative writing and digital media.

*Natural Learning for a Connected World* Renate Nummela Caine, 2011-04-08 Why do video games fascinate kids so much that they will spend hours pursuing a difficult skill? Why don't they apply this kind of intensity to their school work? In their most penetrating and important work in years, these two leaders in the field of brain-based education build a bridge to the future of education with a dynamic model of teaching that works for all grade levels and in all cultural and ethnic groups. The authors' education model, the Guided Experience Approach, is based on the way that biologists see learning as a totally natural, continuous interaction between perception and action. *Natural Learning for a Connected World* provides a practical, step-by-step description and successful examples from practice of this perception-action cycle so that we can finally provide the learning environments essential for our children to thrive in the knowledge age.
