Colonisation And Conquest In Medieval Ireland The English In Louth 1170 1330:

Colonisation and Conquest in Medieval Ireland Brendan Smith, 1999-04-22 This book examines the development of English colonial society in the eastern coastal area of Ireland now known as county Louth in the period 1170 1330 At its heart is the story of two relationships that between settler and native in Louth and that between the settlers and England An important part of the story is the comparison with parts of Britain which witnessed similar English colonization Fifty years before the arrival of the English Louth was incorporated into the Irish kingdom of Airgiolla experiencing rapid change in the political and ecclesiastical spheres under its dynamic ruler Donnchad Ua Cerbaill The impact of this legacy on English settlement is given due prominence The book also explores the reasons why well to do members of local society in the West Midlands of England in the reigns of Henry II and his sons were prepared to become involved in the Irish adventure

Authors, Factions, and Courts in Angevin England Fabrizio De Falco, 2023-12-20 Authors Factions and Courts in Angevin England A Literature of Personal Ambition 12th 13th Century advances a model for historical study of courtly literature by foregrounding the personal aims networks and careers as the impetus for much of the period s literature The book takes two authors as case studies Gerald of Wales and Walter Map to show how authors not only built their own stories but also used popular narratives and the tools of propaganda to achieve their own personal goals The purpose of this study is to overturn the top down model of political patronage in which patrons and particularly royal patrons set the cultural agenda and dictate literary tastes Rather Fabrizio De Falco argues that authors were often representative of many different interests expressed by local groups To pursue those interests they targeted specific political factions in the changeable political scenario of Angevin England Their texts reveal a polycentric view of cultural production and its reception The study aims to model a heuristic process which is applicable to other courtly texts besides the chosen case studies **Liberties and**

Identities in the Medieval British Isles Michael Prestwich, 2008 In depth examinations of the role played by liberties across the British Isles A Cumulative Bibliography of Medieval Military History and Technology, Update 2003-2006 Kelly DeVries, 2008-01-31 This is the second update of A Cumulative Bibliography of Medieval Military History and Technology which appeared in 2002 It is meant to do two things to present references to works on medieval military history and technology not included in the first two volumes and to present references to all books and articles published on medieval military history and technology from 2003 to 2006 These references are divided into the same categories as in the first two volumes and cover a chronological period of the same length from late antiquity to 1648 again in order to present a more complete picture of influences on and from the Middle Ages It also continues to cover the same geographical area as the first and second volume in essence Europe and the Middle East or again influences on and from this area The languages of these bibliographical references reflect this geography On the Edge of the Pale Linda Clare, 2006 The area around Syddan Co Meath was the flashpoint between two civilizations the Gael and the Gaill in late medieval times This territory became well

known as it was on the border of the Pale where the forces of the northern Irish came face to face with the English Combining an invaluable richness of sources particularly the Dowdall deeds she has succeeded in recreating a world full of action and characters while exploring their values and the pressures under which they lived It is interesting to discover that the communities in the northern borders of the Pale retained their identities for so much longer than elsewhere

Colonisation and Conquest in Medieval Ireland Brendan Smith, 1999-04-22 The history of English rule in Ireland stretches back to the twelfth century This book examines the actions of the earliest English settlers in Ireland and asks a number of questions about the society they developed there Why did these people come to Ireland How did they interact with the native Irish neighbors What was the nature of their relationship with England This was also a time of English expansion in Wales and Scotland and the book suggests comparisons and contrasts with the Irish experience in this broader setting

Arts & Humanities Citation Index , 2001 *Ireland and Britain, 1170-1450* Robin Frame, 1998-07-01 In this collections of essays Robin Frame concentrates upon two themes the place of the Lordship of Ireland within the Plantagenet state an the interaction of settler society and English government in the culturally hybrid frontier world of later medieval Ireland itself As a prelude of both these themes Ireland and Britain 1170 1450 begins with a discussion of why the first English conquest of Ireland has been viewed as a failure The first group of essays addresses such topics as the changing character of the aristocratic networks that bound Ireland to Britain the impact of the Scottish invasion led by Edward and Robert Bruce in the early fourteenth century the identity of the English political community that emerged in Ireland by the reign of Edward III and the case for a broadly conceived English history incorporating rather than excluding the English of Ireland The subsequent group explore the character of Irish warfare the adaptation of English institutions to a marcher environment the exercise of power by regional magnates and the complex practical interactions between royal government and Gaelic Irish leaders

Crisis and Survival in Late Medieval Ireland Brendan Smith, 2013-06-20 This volume explores the ways in which the English settlers in Louth maintained their English identity in the face of plague and warfare through the turbulent decades between 1330 and 1450 Conquest and Colonisation Mary Elizabeth Collins, 1969 **Ireland 1170-1509,**

Society and History Desmond Keenan, 2010-09-29 The history of medieval Ireland cannot be understood without some knowledge of the historical and social background Also many concepts familiar to readers in Ireland are not familiar to readers in other countries Therefore I have supposed that many readers will be coming to the subject for the first time I trust that those who are already familiar with the subject will not regard me as condescending Everyone has to start at some point It should be remembered that records were kept and history written about the activities of the chiefs and noblemen Little was written about ordinary people who formed the vast bulk of the population We have to find what we can about them indirectly for example from records of harvests kept on big estates All of western civilization is derived from what happened

in the various lands and regions in Western Europe after the decline and fall of the Western Roman Empire. Numerous warrior families poured across the old frontiers of the Empire and adapted themselves to the Roman way of life. Usually they adopted the Latin language though in England they did not. As the political and military power of Rome declined, another power developed: that of the Christian Church based on Rome. It kept literacy and the art of writing alive. The various post-Roman states were ruled by kings who depended on the Christian clergy for much of their administration and indeed for their defence. This however led to prolonged disputes as to the limits of the authority of the religious and secular powers. These states were then subjected to prolonged attacks by pagan peoples like the Vikings and Huns from the north, the south and the east. They gradually reorganised themselves to beat off the invaders. Central to this organisation was the castle and the mounted knight. The whole structure of society was reformed on the basis of supporting these. At the same time there were attempts to get the clergy to lead lives different from those of knights and more in keeping with their religious vocation. The invaders were driven off. Those to the north and east accepted Christianity and developed their states on the latest western European lines. Only in the south in Spain and Africa did the threat remain. England, a former province of the Roman Empire, was taken over by various Germanic speaking families called Angles and Saxons and they at an early date accepted Christianity. England suffered very heavily from the raiders from the north, the Vikings, but early in the 10th century succeeded in forming a unified kingdom and controlling the Vikings. In the 11th century the Anglo-Saxon rulers were overthrown by Normans from Normandy who introduced the feudal system of government which had grown up on the Continent. Ireland though never a part of the Roman Empire had accepted Christian missionaries in the 5th century and became a Christian country. It too suffered from the Viking invasions and succeeded largely in overcoming them. Many of the Vikings remained in Ireland and brought many innovations to Ireland. As an island beyond an island, Ireland was usually the last to keep up with developments. The Irish clergy began to try to adapt themselves to the standards of the new reform in Church affairs on the Continent. There was a fresh irruption into Irish affairs when some of the Norman king of England's subjects were invited to take part in a struggle between Irish chiefs and were promised grants of land in Ireland. This would effectively have removed them from the authority of their feudal overlord so he too went to Ireland to assert his authority over them. He received a general assent from the Norman knights, the Gaelic chiefs and the Irish bishops that he would be their feudal overlord and then departed. That might have been the end of the matter. For various reasons it became necessary to send more knights to Ireland to maintain the peace and to assert the king's authority. The knights for their part began to develop.

COLONY & FRONTIER IN MEDIEVAL IRELAND T. B. Barry, Frame, Katharine Simms, 1995-01-01. These essays explore aspects of the English colony in medieval Ireland and its relations with the Gaelic host society. They deal both with the foundation and expansion of the English lordship in the twelfth and early thirteenth centuries and with the problems and adjustments that accompanied its contraction in the later middle ages. Attention is paid both to the government and society of

the colony itself and to the interactions between settler and native

Cultural Exchange and Identity in Late Medieval Ireland Sparky Booker, 2018-03-22 Irish inhabitants of the four obedient shires a term commonly used to describe the region at the heart of the English colony in the later Middle Ages were significantly anglicised taking on English names dress and even legal status However the processes of cultural exchange went both ways This study examines the nature of interactions between English and Irish neighbours in the four shires taking into account the complex tensions between assimilation and the preservation of distinct ethnic identities and exploring how the common colonial rhetoric of the Irish as an enemy coexisted with the daily reality of alliance intermarriage and accommodation Placing Ireland in a broad context Sparky Booker addresses the strategies the colonial community used to deal with the difficulties posed by extensive assimilation and the lasting changes this made to understandings of what it meant to be English or Irish in the face of such challenges
