

A lush, multi-tiered Japanese garden. In the foreground, there's a green lawn with several small, dark, conical garden lights. To the left, a large, dense, yellow-green tree stands prominently. The garden is filled with various plants, including red and yellow flowers, and green shrubs. The background shows more greenery and a large, dark tree. The overall scene is a well-maintained and colorful landscape.

**The Principles of Harmony and Contrast of Colours, and Their Applications to the Arts** Michel Eugène Chevreul, 1855      **Applying Color Theory to Digital Media and Visualization** Theresa-Marie Rhyne, 2016-10-14 This book provides an overview of the application of color theory concepts to digital media and visualization. It highlights specific color concepts like color harmony and shows how to apply the concept with case study examples and usage of actual online and mobile color tools. Color deficiencies are reviewed and discussed, and color tools for examining how a specific color map design will look to someone with the deficiency are shown. Other books on color examine artists' use of color, color management, or color science. This book applies fundamental color concepts to digital media and visualization solutions. It is intended for digital media and visualization content creators and developers. Presents Color Theory Concepts that can be applied to digital media and visualization problems over and over again. Offers Comprehensive Review of the Historical Progression of Color Models. Demonstrates actual case study implementations of color analyses tools. Provides overview of Color Theory and Harmony Analytics in terms of online and mobile analysis tools. Teaches the color theory language to use in interacting with color management professionals.

*The Principles of Harmony and Contrast of Colors and Their Applications to the Arts* Michel Eugène Chevreul, Faber Birren, 1987 This monumental masterwork by the renowned nineteenth century scientist and authority on color M E Chevreul is unquestionably one of the greatest books ever written on color. The first English translation is reprinted here with the original color restored and an introduction and explanatory notes by Faber Birren, the leading color authority of the present time. Chevreul's book dominated the schools of Impressionism and Neo Impressionism and exerted profound influence on later schools of painting including today's Op Art. Chevreul set forth principles that have become basic in color training throughout the Western world. In his illuminating commentary Mr Birren shows how many of Chevreul's ideas on color harmony, contrast, effects, optical mixtures, and legibility have been validated by modern scientific research in visual perception. Mr Birren also provides a helpful glossary of Chevreul's terminology. Lavishly illustrated, the volume contains many color plates including 15 plates from the original French edition, photographs of Gobelins tapestries, and full page reproductions of outstanding Impressionist and Neo Impressionist paintings. Essential as a reference book for artist and art educators, this volume will also be a source of fresh inspiration for fashion designers, interior decorators, and all others concerned with color in any medium, and it makes good reading for all those interested in the history of men and ideas.
