Combinatorial Pattern Matching Amihood Amir, Gad M. Landau, 2003-06-29 This book constitutes the refereed proceedings of the 12th Annual Symposium on Combinatorial Pattern Matching CPM 2001 held in Jerusalem Israel in July 2001 The 21 revised papers presented together with one invited paper were carefully reviewed and selected from 35 submissions The papers are devoted to current theoretical and algorithmic issues of searching and matching strings and more complicated patterns such as trees regular expressions graphs point sets and arrays as well as to advanced applications of CPM in areas such as the Internet computational biology multimedia systems information retrieval data compression coding computer vision and pattern recognition

**Groupware: Design, Implementation, and Use** Jörg M. Haake, Jose A. Pino, 2002-08-14 Welcome to the 8th International Workshop on Groupware CRIWG 2002 The previous workshops took place in Lisbon Portugal 1995 Puerto Varas Chile 1996 El Escorial Spain 1997 B zios Brazil 1998 Cancun Mexico 1999 Madeira Portugal 2000 and Darmstadt Germany 2001 CRIWG workshops follow a simple recipe for success good papers a small number of participants extensive time for lively and constructive discussions and a high level of cooperation both within and between paper sessions CRIWG 2002 continued this tradition CRIWG 2002 attracted 36 submissions from 13 countries nine of them outside Ibero America Each of the 36 articles submitted was reviewed by at least three members of an internationally renowned Program Committee This year we used a double blind reviewing process i e the reviewers did not know who the authors of the papers were In addition the reviewers were chosen based on their expertise and we also ensured that they came from countries and institutions not related to those of the paper s authors This reviewer assignment worked remarkably well as indicated by the high average confidence value the reviewers gave their own reviews This means that papers were usually reviewed by experts in the paper s topic As a consequence reviews were usually quite extensive and contained many suggestions for provements I would like to thank all the members of the Program Committee for their hard work which I am sure contributed to improving the quality of the final articles

**From Sequences to Graphs** Annie Chateau, Mikaël Salson, 2022-11-01 In order to study living organisms scientists not only study them at an overall macroscopic scale but also on a more detailed microscopic scale This observation pushed to its limits consists of investigating the very center of each cell where we find the molecules that determine the way it functions DNA deoxyribonucleic acid and RNA ribonucleic acid In an organism DNA carries the genetic information which is called the genome It is represented as four letter sequences using the letters A C G and T based on these sequences computer methods described in this book can answer fundamental questions in bioinformatics This book explores how to quickly find sequences of a few hundred nucleotides within a genome that may be made up of several billion how to compare those sequences and how to reconstruct the complete sequence of a genome It also discusses the problems of identifying bacteria in a given environment and predicting the structure of RNA based on its sequence

**Database Systems for Advanced Applications** Selçuk

Candan,Lei Chen,Torben Bach Pedersen,Lijun Chang,Wen Hua,2017-03-20 This two volume set LNCS 10177 and 10178 constitutes the refereed proceedings of the 22nd International Conference on Database Systems for Advanced Applications DASFAA 2017 held in Suzhou China in March 2017 The 73 full papers 9 industry papers 4 demo papers and 3 tutorials were carefully selected from a total of 300 submissions The papers are organized around the following topics semantic web and knowledge management indexing and distributed systems network embedding trajectory and time series data processing data mining query processing and optimization text mining recommendation security privacy sensor and cloud social network analytics map matching and spatial keywords query processing and optimization search and information retrieval string and sequence processing stream data processing graph and network data processing spatial databases real time data processing big data social networks and graphs

**High-Performance Automation Methods for Computational Intelligent Systems** Vijay Kumar Sharma,Sachin Kumar Gupta,2025-08-29 Computational methods are necessary for the proper execution of the applications for the benefit of society and technological development Technological development makes life easier by constructing powerful systems with the help of computational methods The nature of computational methods changes from time to time and retains only efficient applicable theories Researchers take the idea of existing computational systems and advance them as per possible future needs Efficient computational methods solve complex problems and also help to make the system more intelligent Automation process requires decision making computational systems A more intelligent system contains an efficient computational method which is described by powerful algorithm development The aim of this book is to identify the technological development for future computational systems which ultimately reflects the more intelligent system Automation has become the need of the hour in today's world and hence the computational systems need to be upgraded to that level to perform the required tasks The most efficient computational algorithm acts like a human being and offers a full sense of intelligent automation This book Presents the latest research trends for the upcoming computational intelligent systems in a comprehensive manner Focuses on the integration of multi purpose and multi dimension natural language into intelligent systems Elaborates on nature inspired and intelligent behaviour based computational methods to deal with the observation of nature Illustrates applications of quantum cellular energy efficient computing methods for automation and applications of genetic algorithms in multidisciplinary fields Discusses aspects of intelligent automation like technology based architecture based logic implementation based and the different algorithms based concepts It is primarily written for senior undergraduates graduate students and academic researchers in the fields of electrical engineering electronics and communications engineering computer science and engineering and information technology
