The Nonsense of Kant and Lewis Carroll Ben-Ami Scharfstein,2024-05-31 What if Immanuel Kant floated down from his transcendental heights straight through Alice s rabbit hole and into the fabulous world of Lewis Carroll For Ben Ami Scharfstein this is a wonderfully instructive scenario and the perfect way to begin this wide ranging collection of decades of startlingly synthesized thought Combining a deep knowledge of psychology cultural anthropology art history and the history

of religions not to mention philosophy he demonstrates again and again the unpredictability of writing and thought and how they can teach us about our experiences Scharfstein begins with essays on the nature of philosophy itself moving from an autobiographical account of the trials of being a comparativist to philosophy's function in the outside world to the fear of death in Kant and Hume From there he explores an impressive array of art from China and Japan to India and the West from an essay on sadistic and masochistic body art to one on the epistemology of the deaf and the blind He then returns to philosophy writing on Machiavelli and political ruthlessness then on the ineffable and closes with a review of Walter Kaufmann's multivolume look at the essence of humanity Discovering the Mind Altogether these essays are a testament to adventurous thought the kind that leaps to the furthest reaches of the possible

Ordering Colours in 18th and Early 19th Century Europe Tanja C. Kleinwächter, Sarah Lowengard, Friedrich Steinle, 2023-10-04 This book describes the international effort to give order to colours and thus facilitate communication about it two topics deemed essential to a modernising world that were also recognizably complex Expert essays will enhance readers understanding of the struggle to coordinate nature with art at a time when approaches to both were undergoing rapid change Ordering Colours shows how such seemingly trivial concerns as identifying the basic colours and disseminating appropriate colour diagrams had to meet philosophical scientific and professional needs across Europe Contributors detail the many schemes for colour systematization and their real world applications questions of concern to both academic and manufacturing focused investigators throughout the long 18th century They bring together original research and new thinking about landmark early modern studies to address important developments as well as neglected historical contributions of European arts sciences and economies This collection is an important addition to the libraries of all who are interested in public culture and manufacturing developments in the early modern period and is aimed at historians of art technology philosophy and physics

Colour in Art John Gage, 2006 The complex phenomenon of colour has received detailed attention from the perspectives of physics chemistry physiology psychology linguistics and philosophy However the people who work most closely with colour artists have rarely been canvassed for their opinions on this mysterious subject Colour in Art is concerned with the history of colour but is not itself a history instead each chapter develops a theme from a different scientific discipline but seen from the viewpoint of artists such as Kandinsky Van Gogh and Anish Kapoor Flags synaesthesia Theosophy theatre design chromotherapy and chromophobia are among the many topics covered in this wide ranging and engaging introduction to the place and power of colour in life and art

Monochrome Craig Staff, 2015-09-17 The monochrome a single colour of paint applied over the entirety of a canvas remains one of the more contentious modernist artistic inventions But whilst the manufacture of these pictures of nothing was ostensibly straightforward their subsequent theorisation has been anything but More than a history Monochrome Darkness and Light in Contemporary Art is the first account of the monochrome's lively role in contemporary art Liberated from the burden of representation the monochrome first stood for emancipation and

ideological and artistic impulse that characterised the avant garde of the early twentieth century Historically the monochrome embodied the most extreme form of abstraction and pure materiality Yet more recently adaptations of the art form have focused on a broader range of cultural and interpretive contexts Provocative innovative and timely this book argues that the latest artistic strategies go beyond stylistic concerns and instead seek to re engage with ideas around authorship process and the conditions of the visible as they are given and understood through both light and darkness Discussing works by artists such as Katie Paterson Hiroshi Sugimoto Tom Friedman Bruno Jakob Sherrie Levine and Ceal Floyer the book shows that the debates around an artwork s form and its possibility for meaning that the monochrome first engendered remain very much alive in contemporary visual culture **On Light** K.P. Clarke, Sarah Baccianti, 2014-12-30

The essays assembled in this new volume explore the fascination of the Middle Ages with the mystery of light and its central role in the period s thought and creativity Spanning medieval theology literature science and material culture the topics covered include the history of light and inseparably darkness as a literary figure from the Latin Bible to Geoffrey Chaucer theoretical speculations on colour sight and blindness and their unexpected fertilization of fields such as poetic imagery medieval preachers evocations of light as much more than merely figuring the moral and religious from St Simeon in the ninth century to John Fisher in the early sixteenth indeed the belief that light possessed not only reality but physical materiality as manifested in artefacts such as the Gloucester Candlestick On Light thereby reveals not only the importance of this phenomenon to diverse aspects of medieval culture but profound and unremarked ways in which it helped to bind these into a whole *Generality Aspects of Color Naming and Color Meaning* Charles Taft, 1997 **Color Chart** Ann Temkin, 2008 Color Chart celebrates a paradox the lush beauty that results when contemporary artists assign colour decisions to chance readymade source or arbitrary system Midway through the 20th century long held convictions regarding the spiritual truth or scientific validity of particular colours gave way to an excitement about colour as a mass produced and standardized commercial product The Romantic quest for personal expression instead became Andy Warhol s I want to be a machine the artistry of mixing pigments was eclipsed by Frank Stella s Straight out of the can it can t get better than that This book and the exhibition it accompanies is the first devoted to this pivotal transformation and features work by some forty artists ranging from Ellsworth Kelly and Gerhard Richter to Sherrie Levine and Damien Hirst **Brilliant Effects** Marcia R. Pointon, 2009 Pointon examines how small scale and valuable artefacts have figured in systems of belief and in political and social practice in Europe since the Renaissance Early Discourses on Colour and Cinema Eirik Frisvold Hanssen, 2006 *The Oxford Dictionary of the Middle Ages* Robert E. Bjork, 2010-06-24 The Oxford Dictionary of the Middle Ages is an outstanding resource for anyone studying or with an interest in all aspects of European history society religion and culture from 500 to 1500 Its 5 000 plus entries written by over 800 international scholars provide uniquely broad balanced and authoritative coverage of the period Leonardo , 2004 International journal of contemporary visual artists **Art in**

America Frank Jewett Mather, Frederic Fairchild Sherman, 1997 **Observing Techniques** Nancy Anderson, 2002 Style and Function in Roman Decoration Ellen Swift, 2009 This work offers a new interpretation of Roman decorative art focusing on the function of decoration in the social context It examines the three principal areas of social display in the Roman world social space entertainment and dress and discusses the significance of the decoration of objects and interiors within these contexts *Journal of Roman Archaeology* ,2003
